

CONTENTS

List of Contributors ix

1. Imaging Life 1

Manfred Auer and Gary C. Howard

PART I Imaging the Macromolecular Inventory

Structure and Mechanistic Function of the Building Blocks of Life

Introduction to Part I 7

Manfred Auer, Natalia Pinzón, and Gary C. Howard

2. Protein Crystallography and X-Ray Diffraction 15

John P. Rose, M. Gary Newton, and Bi-Cheng Wang

3. Magnetic Resonance in Structural Biology 51

G. Marius Clore

4. Cryo-Electron Microscopy 74

Phoebe L. Stewart

**5. Single-Molecule Imaging and Force Spectroscopy by Atomic Force
Microscopy 94**

K. Tanuj Sapra and Daniel J. Muller

6. Biological Imaging Using X-Ray Free-Electron Lasers 141

Stefan P. Hau-Riege

PART II Imaging Cellular and Tissue Architecture

How It All Fits Together to Sustain Life

Introduction to Part II 169

Manfred Auer, Natalia Pinzon, and Gary C. Howard

**7. Bridging the Resolution Gap: Electron Tomography and Advanced
Three-Dimensional SEM Approaches for Cellular Volumes 179**

Manfred Auer

8. Correlated Soft X-Ray Tomography and Cryo-Light Microscopy 209
*Elizabeth A. Smith, Bertrand P. Cinquin, Gerry McDermott,
Mark A. Le Gros, and Carolyn A. Larabell*
9. Breaking Abbe's Law: Super-Accuracy and Super-Resolution Fluorescence
Microscopy based on Single Molecule Detection 228
Sethuramasundaram Pitchaiya, John R. Androsavich, and Nils G. Walter
10. STED Microscopy 260
Valentin Nägerl
11. Imaging the (Macro)Molecular Composition: Mass Spectrometry Imaging 277
Brendan Prideaux
12. Nondestructive Molecular Mapping and Imaging: Synchrotron FTIR Spectral
Microscopy 302
Hoi-Ying Holman and Liang Chen
13. Raman Spectroscopic Imaging of Biological Systems 339
*Martin Schmidt, Pradeep N. Perera, Alexander Weber-Bargioni,
Paul D. Adams, and P. James Schuck*
14. Automated Microscopic Imaging and Survival Statistics 378
Steven Finkbeiner
- PART III Modeling of Complex Biological Functions**
- Introduction to Part III 391
Manfred Auer, Natalia Pinzon, and Gary C. Howard
15. From Voxel Maps to Models: Quantitative Analysis and Visualization of
Macromolecular Machines 397
Chandrajit Bajaj
16. Building and Using 3D Digital Atlases of Complex Model Animals at the
Single Cell Resolution 430
Hanchuan Peng
- PART IV Conclusions**
17. Quo Vadis, Imaging? 451
Manfred Auer and Gary C. Howard
- Index 457
