II

Chapter 10 Respiration: releasing energy from food

10.1	How can the energy stored in food be released?	3
10.2	In what forms are energy released?	6
10.3	Comparison of burning and respiration	10
10.4	How is the released energy used?	11
10.5	Does respiration always need oxygen?	12
10.6	Is anaerobic respiration important?	16

Chapter 11 Gaseous exchange in humans and plants

11.1	What is gaseous exchange and why is it needed?	26
11.2	The human breathing system	27
11.3	Gaseous exchange between humans and the atmosphere	34
11.4	Gaseous exchange in the alveoli	36
11.5	The action of breathing	38
11.6	The effect of exercise on the rate and depth of breathing and its relation to energy requirements	43
11.7	Lung volumes	46
11.8	The effects of smoking and its health hazards	47
11.9	Gaseous exchange in plants	50

Chapter 12 Water and organisms

12.1	Why is water important to organisms?	61
12.2	Relationship between water and organisms in the cells	65
12.3	Relationship between water and organisms at the organism level	73
12.4	Transpiration in plants	74
12.5	Uptake of water by plants	82

Chapter 13 Transport in organisms

13.1	The importance of a transport system in organisms	94
13.2	The mammalian circulatory system	95
13.3	What is inside blood?	96
13.4	The functions of blood in transport	98
13.5	Blood groups and blood transfusion	103
13.6	Arteries, veins and capillaries	105

13.7	The mammalian heart	112
13.8	How blood flows: the circulatory system	120
13.9	Exchange of materials between the blood and the body cells	123
13.10	The lymphatic system	125
13.11	Transport in flowering plants	128

Chapter 14 Support and movement

14.1	What is support?	145
14.2	Support in mammals	146
14.3	Support in plants	155
14.4	Locomotion in mammals	158

Chapter 15 Detection of environmental conditions by mammals

15.1	Irritability	173
15.2	Detection of environmental conditions in mammals	175
15.3	The structures and functions of the eye	175
15.4	How is the image formed and interpreted as sight?	183
15.5	How does the eye accommodate to focus near and distant objects?	184
15.6	Eye defects	187
15.7	The structures and functions of the ear	193
15.8	How do we hear?	198
15.9	How do we detect changes of movement to maintain balance?	199
15.10	Detection of smell and taste	200
15.11	Detection of touch and heat	202

Integrated learning: What happens when there is a fire?	212
