Preface	xi
Acknowledgements	xiii
1 Evolution of birds	1
1.1 Birds are dinosaurs	2
1.2 <i>Archaeopteryx</i>	3
1.3 The evolution of modern birds	6
When did the modern lineages arise?	6
1.4 The phylogeny of birds	7
Morphological phylogeny	7
Character conservation and convergence	8
Biomolecular phylogeny	9
Putative phylogenies	10
1.5 Adaptive radiation and speciation	14
Darwin's finches	15
Hybrids	16
Summary	22
Questions for discussion	22
Appendix 1	22
2 Feathers and flight	27
2.1 Feathers	27
Feather types	28
Contour feathers	28
Down feathers and semiplumes	31
2.2 Feather tracts	31
2.3 Feather colour	33
2.4 Feather damage	33
2.5 Feather maintenance	34
2.6 Moulting	35
Moulting strategies	37

2.7	Flight	39
	Gliding and soaring	42
	Flapping flight	42
	Respiration and flight energetics	44
	Flight speeds	48
2.8	The evolution of flight and flightlessness	49
	Summary	50
	Questions for discussion	50
3	Movement: migration and navigation	51
3.1	The ecology of migration	52
3.2	Genes and migration	55
3.3	Physiology of migration	59
3.4	The weather and migration	63
3.5	Navigation	64
	Navigational cues	65
3.6	Spatial memory	68
	Summary	70
	Questions for discussion	71
4	Eggs, nests, and chicks	73
4.1	Sex and the gonads of birds	73
4.2	The egg	75
4.3	Egg shell coloration and patterning	80
	Camouflage	80
	Egg mimicry	81
	Egg recognition	81
	Signals of quality	84
	Pigments and shell quality	84
4.4	Incubation and the developing embryo	86
4.5	Hatching	90
4.6	Chicks	90
	Summary	91
	Questions for discussion	92
5	Reproduction	93
5.1	Males and females are different	93
5.2	Mating systems	96
5.3	Courtship and mate choice	98
	Resource provision	99
	Ornaments and displays	101
	Sharing a mate	101

5.4	Bird Song	106
	Song learning	107
	Functions of song	107
	Synchronized singing	110
5.5	Raising a family	112
	Begging	113
	Imprinting and independence	117
	Summary	117
	Questions for discussion	118
6	Foraging and avoiding predators	119
6.1	Foraging	119
	Finding food and capturing prey	119
	Sharing information	120
	Foraging flocks	122
	Do herbivores cooperate?	123
6.2	Optimal foraging	124
	Feeding territories	125
6.3	Risk and foraging	127
6.4	Predator avoidance	128
	Camouflage	128
	Predator distraction displays	129
	Tonic immobility	130
	Alarm calls	130
	Mobbing	134
	Flocks and colonies	134
	Summary	137
	Questions for discussion	137
7	Populations, communities, and conservation	139
7.1	Populations	139
	Life history strategies influence population growth	140
	Population change	140
7.2	Communities	144
	Communities are dynamic	145
	Niche divergence	147
	Niche shifts, ecological release, and competition	150
7.3	Extinction and conservation	152
	Conservation can be a success	154
	Summary	155
	Questions for discussion	155
	Index	157
