

Contents

1	Mangroves and Seagrasses	1
1.1	Mangroves	2
1.2	Seagrasses	4
2	Mangroves and Their Environment	8
2.1	Adaptations to waterlogged soil	8
2.2	Coping with salt	17
2.3	The cost of survival	23
2.4	Inorganic nutrients	26
2.4.1	<i>Nitrogen</i>	27
2.4.2	<i>Phosphorus</i>	29
2.4.3	<i>Nutrient recycling</i>	29
2.4.4	<i>Are mangroves nutrient limited?</i>	30
2.5	Reproductive adaptations	32
2.5.1	<i>Pollination</i>	32
2.5.2	<i>Vivipary</i>	33
2.5.3	<i>Fecundity and parental investment</i>	36
2.5.4	<i>Dispersal and settlement</i>	37
2.6	Why are mangroves tropical?	41
3	Seagrasses and Their Environment	44
3.1	Growth and structure	44
3.2	Waves, currents, and sediment	46
3.3	Photosynthesis and respiration	47
3.4	Salinity	48
3.5	Nutrients	50
3.6	Reproduction	51
3.7	Propagule dispersal	53
4	Community Structure and Dynamics	55
4.1	Mangroves: form of the forest	55

4.1.1 <i>Species zonation</i>	57
4.1.1.1 Propagule sorting	60
4.1.1.2 Physical gradients	60
4.1.1.3 Plant succession and species interactions	63
4.1.1.4 Geomorphological change	66
4.1.2 <i>How different are mangroves from other forests?</i>	67
4.1.3 <i>Do mangroves create land? Mangroves as ecosystem engineers</i>	70
4.2 Seagrass meadows	74
5 The Mangrove Community: Terrestrial Components	80
5.1 Mangrove-associated plants	80
5.2 Animals from the land	81
5.2.1 <i>Insects</i>	82
5.2.1.1 Insect herbivores	82
5.2.1.2 Termites	86
5.2.1.3 Ants	87
5.2.1.4 Mosquitoes and other biting insects	89
5.2.1.5 Synchronously flashing fireflies	90
5.2.1.6 Other insects	91
5.2.2 <i>Spiders</i>	92
5.2.3 <i>Vertebrates</i>	92
5.2.3.1 Amphibians	93
5.2.3.2 Reptiles	94
5.2.3.3 Birds	98
5.2.3.4 Mammals	102
6 The Mangrove Community: Marine Components	107
6.1 Algae	107
6.2 Fauna of mangrove roots	108
6.3 Invertebrates	110
6.3.1 <i>Crustaceans</i>	110
6.3.1.1 Crabs	111
<i>Leaf-eating by crabs</i>	112
<i>Are crabs selective feeders?</i>	114
<i>Seedlings</i>	117
<i>Tree-climbing crabs</i>	118
<i>How important are herbivorous crabs?</i>	118
<i>Fiddler crabs</i>	119
<i>The physiology of living in mud</i>	122
6.3.1.2 Other mangrove crustacea	126
6.3.1.3 Crustaceans as ecosystem engineers	127

6.3.2 <i>Molluscs</i>	129
6.3.2.1 Snails	129
6.3.2.2 Bivalves	132
6.4 Meiofauna	132
6.5 Fish	135
7 Seagrass Communities	139
7.1 Epiphytes	139
7.2 Molluscs	141
7.3 Crustaceans	142
7.4 Echinoderms	143
7.5 Fish	144
7.6 Turtles	146
7.7 Marine mammals: dugongs, manatees, and sea otters	147
7.8 Birds	149
8 Measuring and Modelling	151
8.1 Mangroves	151
8.1.1 <i>How to measure a tree</i>	152
8.1.2 <i>Biomass</i>	152
8.1.3 <i>Estimating production</i>	155
8.1.4 <i>What happens to mangrove production?</i>	158
8.1.4.1 Microbial breakdown	159
8.1.4.2 Crabs and snails	161
8.1.4.3 Wood	162
8.1.4.4 The role of sediment bacteria	163
8.1.4.5 The fate of organic particles	164
8.1.4.6 Predators	165
8.1.5 <i>Putting the model together</i>	166
8.2 Seagrasses	168
9 Comparisons and Connections	170
9.1 How distinctive are mangrove and seagrass communities?	170
9.2 Mangroves and salt marshes	171
9.3 Interactions	172
9.4 Outwelling	173
9.5 The fate of mangrove carbon	175
9.6 Mangroves, seagrasses, and coral reefs	178
9.7 Movement between habitats	179
9.7.1 <i>Larval dispersal and return</i>	179
9.7.2 <i>Commuters</i>	180

9.8 Mangroves, seagrasses, and fisheries	183
9.8.1 Shrimps	183
9.8.2 Fish	186
10 Biodiversity and Biogeography	188
10.1 What is biodiversity?	188
10.2 Mangroves	189
10.2.1 Regional diversity	189
10.2.2 Origins	192
10.2.3 Local diversity	197
10.2.4 Genetic diversity	200
10.2.5 Faunal diversity	201
10.3 Seagrass biogeography and biodiversity	203
10.4 Diversity and ecosystem function	206
11 Impacts	211
11.1 Mangroves	211
11.1.1 Goods and services	212
11.1.1.1 Mangrove products	213
11.1.1.2 Coastal protection	216
11.1.1.3 Ecotourism	217
11.1.2 What are mangroves worth?	217
11.1.3 Threats	220
11.1.3.1 Hurricanes and typhoons	221
11.1.3.2 The threat of overexploitation	221
Sustainable management: the case of the Matang	222
11.1.3.3 Shrimps versus mangroves?	224
11.1.3.4 Mangroves and pollution	227
11.1.3.5 Changes in hydrology	229
Mangroves of the Indus delta	230
11.1.4 Mangrove restoration	234
11.2 Seagrasses: benefits and threats	236
12 Global Climate Change	238
12.1 Rise in atmospheric carbon dioxide	238
12.2 Global warming	240
12.3 Sea level rise	242
12.4 Interactions	243
12.5 Do mangroves and seagrasses have a future?	245
Further Reading	247
