
Contents

List of contributors	xi
1. Introduction	1
Daniel González-Tokman, Isaac González-Santoyo, and Alex Córdoba-Aguilar	
2. The genetics of reproductive behavior	3
John Hunt, James Rapkin, and Clarissa House	
3. Neurobiology	32
Anne C. von Philipsborn	
4. The role of hormones	49
H. Frederik Nijhout and Emily Laub	
5. Phenotypic plasticity	63
Karen D. Williams and Marla B. Sokolowski	
6. Habitat selection and territoriality	80
Darrell J. Kemp	
7. Long-range migration and orientation behavior	98
Don R. Reynolds and Jason W. Chapman	
8. Feeding behavior	116
Stephen J. Simpson, Carlos Ribeiro, and Daniel González-Tokman	
9. Anti-predator behavior	130
Thomas N. Sherratt and Changku Kang	
10. Chemical communication	145
Bernard D. Roitberg	
11. Visual communication	158
James C. O'Hanlon, Thomas E. White, and Kate D.L. Umbers	
12. Acoustic communication	174
Heiner Römer	

13. Reproductive behavior	189
Rachel Olzer, Rebecca L. Ehrlich, Justa L. Heinen-Kay, Jessie Tanner, and Marlene Zuk	
14. Parental care	203
Glaucio Machado and Stephen T. Trumbo	
15. Sociality	219
Jennifer Fewell and Patrick Abbot	
16. Personality and behavioral syndromes in insects and spiders	236
Carl N. Keiser, James L.L. Lichtenstein, Colin M. Wright, Gregory T. Chism, and Jonathan N. Pruitt	
17. Cognition and learning	257
Reuven Dukas	
18. The influence of parasites	273
Pedro F. Vale, Jonathon A. Siva-Jothy, André Morrill, and Mark R. Forbes	
19. Behavioral, plastic, and evolutionary responses to a changing world	292
Wolf U. Blanckenhorn	
20. Behavior-based control of insect crop pests	309
Sandra A. Allan	
21. Behavior-based control of arthropod vectors: the case of mosquitoes, ticks, and Chagasid bugs	332
Ana E. Gutiérrez-Cabrera, Giovanni Benelli, Thomas Walker, José Antonio De Fuentes-Vicente, and Alex Córdoba-Aguilar	
22. Insect behavior in conservation	348
Tim R. New	
General Glossary	363
Index	375
