xv

1 An introduction to mammalian synthetic biology

i

Professor Jamie A. Davies

What is a mammal?

2

Why do mammalian synthetic biology?

6

How is mammalian synthetic biology done?

8

What is easy, and what is hard?

11

2 Special features of mammalian systems

15

Professor Jamie A. Davies

Mammalian genes

16

Mammalian cells

22

Mammalian cells in culture

26

In vivo issues

29

The problems versus the power

30

3 Technologies for mammalian synthetic biology

33

Dr Leonard J. Nelson and Professor Alistair Elfick

We can read DNA very well

34

We can edit DNA pretty well

37

Rewriting approaches—genome editing tools

37

CRISPR/Cas9 revolution

37

Assembly of DNA parts

39

We can write DNA quite well too

39

But our capacity to author DNA remains modest

41

The next challenge is getting the modified DNA into mammalian cells

42

Getting the DNA to stay in the cell can be difficult too

42

Mammalian cellular repair machinery

45

Finally, we need to know our modified DNA is functional

45

4 Mammalian synthetic biology as a research tool

50

Professor Jamie A. Davies

Synthetic tools for analytic biology

51

Building to test ideas

56

5 Teaching mammalian cells to make new, useful things	66
<i>Jamie Billington, Anna Mastela, and Professor Susan J. Rosser</i>	
Therapeutic proteins: the next generation of drugs	67
Cell factories for protein production	69
Mammalian cell lines	72
Using synthetic biology to improve cells for bioproduction	75
Producing therapeutic proteins in the body	76
Going agricultural: synthetic biology in farm animals	79
6 Synthetic biology, stem cells, and regenerative medicine	84
<i>Professor Steven M. Pollard</i>	
What are stem cells?	85
Stem cell differentiation	89
Transcription factor 'master regulators' and reprogramming	89
Synthetic transcription factors	92
The road ahead	95
7 The ethics of synthetic biology	97
<i>David Obree</i>	
Ethics overview	98
From analysis to synthesis	99
The appeal to nature	100
Potential benefits, potential harms, and uncertainty	101
Human enhancement	103
The environment	105
Responsibility and safety	106
Justice and fairness	107
Conclusion	108
Glossary	111
Bibliography	117
Index	119
