Four steps to exam success *vii*

Using this guide *ix*

Acknowledgements *xiii*

Abbreviations *xv*

Chapter 1

Introduction to Immune Responses, Cells, Mediators, and Structures *1*

1.1 Purpose and overview of the immune system *2*

1.2 Inflammation *3*

1.3 Innate immunity *9*

1.4 Adaptive immunity *10*

1.5 Structure, cells and mediators of the immune system *15*

1.6 Nomenclature *29*

Chapter 2

How is the Immune System Activated? *33*

2.1 Recognition by the innate immune system *34*

2.2 Recognition by the adaptive immune system *42*

2.3 Activation of the adaptive immune system *48*

Chapter 3

How Does the Immune System Destroy? *66*

3.1 Destruction: innate effector mechanisms *67*

3.2 Destruction: adaptive effector mechanisms *81*

Chapter 4

The Role of the Immune System in Health and Disease *92*

4.1 Immunodeficiency *93*

4.2 Autoimmunity *104*

4.3 Hypersensitivity *107*

4.4 Transplantation *111*

4.5 Tumour immunity *116*

Glossary *123*

Index *141*
