1. Introduction: why a new methods book on primate ecology and conservation?

1

Eleanor J. Sterling, Nora Bynum, and Mary E. Blair

- 1.1 Organization of the book 2
- 1.2 Getting started: key points of advice for planning a research project 4
- 1.3 Primate ecology and conservation in a changing world 8

2. Primate census and survey techniques

10

Andrew J. Plumptre, Eleanor J. Sterling, and Stephen T. Buckland

- 2.1 Introduction 10
- 2.2 History of primate surveying 11
- 2.3 Total count methods 12
- 2.4 Genetic methods of surveying 13
- 2.5 Line transect methods 13
- 2.6 Using group calls to survey primates 18
- 2.7 Measurements of relative abundance and occupancy 20
- 2.8 Nocturnal primates 21
- 2.9 Tools that can help with primate surveys 23
- 2.10 Monitoring primates for conservation 24
- 2.11 Conclusion 25

3. Darting, anesthesia, and handling

27

Kenneth E. Glander

- 3.1 Introduction—the role of capture in primate field studies 27
- 3.2—Permits, licenses, and approvals 29
- 3.3 Public relations 30
- 3.4 Trapping vs. darting 30
- 3.5 Darting methods and equipment 31
- 3.6 Drug type and dose 34
- 3.7 Safety considerations while handling a captured animal 36
- 3.8 Recovery 37

3.9	Release	38
3.10	Safety concerns for researchers	38
3.11	Accountability	39
3.12	Conclusion	39

4. Health assessment and epidemiology 40

Michael P. Muehlenbein and Cari M. Lewis

4.1	Introduction	40
4.2	Primate zoonoses and anthroozoonoses	40
4.3	Methods for collection and analyses	42
4.4	Some modest advice	50
4.5	Going beyond basic health monitoring	54

5. Behavior within groups 58

Beth A. Kaplan and Apollinaire William

5.1	Introduction	58
5.2	What is a primate group?	59
5.3	The habituation process	61
5.4	Techniques and approaches in sampling behavior within primate groups	63
5.5	What kinds of questions are asked about behavior within groups?	66
5.6	Geographic Information Systems (GIS) and within-group behavior	72
5.7	Social network theory and network analysis	74
5.8	Conclusion	77

6. Habitat assessment and species niche modeling 79

E. Johanna Rode, Carrie J. Stengel, and K. Anne-Isola Nekaris

6.1	Introduction	79
6.2	Habitat assessment	79
6.3	Species niche modeling	93
6.4	Concluding remarks	101

7. Characterization of primate environments through assessment of plant phenology 103

Andrew J. Marshall and Serge Wich

7.1	Introduction	103
7.2	Field methods	104
7.3	Data considerations	122
7.4	Conclusion	125

8. Methods in ethnoprimateology: exploring the human–non-human primate interface	128
<i>Erin P. Riley and Amanda L. Ellwanger</i>	
8.1 Introduction	128
8.2 Fieldwork logistics	129
8.3 Measuring the effect of anthropogenic disturbance on primate behavioral ecology	134
8.4 Exploring human–non-human primate overlap	136
8.5 Exploring the cultural interconnections: knowledge and perceptions of nature	147
8.6 Conclusions	149
9. Social and spatial relationships between primate groups	151
<i>Michelle Brown and Margaret Crofoot</i>	
9.1 Ramifications of inter-group interactions	151
9.2 Classes of inter-group relationships	153
9.3 Field methods and analyses for studying interactions between groups: observations of naturally-occurring interactions	155
9.4 Field methods and analyses for studying interactions between groups: simulating (and stimulating) interactions	164
9.5 Field methods and analyses for studying interactions between groups: detecting the impact of inter-group interactions on patterns of movement and space use	166
9.6 Directions for future research	175
10. Experiments in primatology: from the lab to the field and back again	177
<i>Charles H. Janson and Sarah F. Brosnan</i>	
10.1 Introduction	177
10.2 Contrasting benefits of field vs. captive experiments	179
10.3 Design constraints of field vs. captive experiments	181
10.4 Experimental paradigms with primates in the field and captivity	186
10.5 Prospects for future collaboration between field and captive researchers	188
10.6 Conclusions	193
11. Diet and nutrition	195
<i>Jessica M. Rothman, Erin R. Vogel, and Scott A. Blumenthal</i>	
11.1 Introduction	195
11.2 Observing the animals	195
11.3 Sample collection	196

11.4 Drying samples	198
11.5 Mechanical analysis	198
11.6 Nutritional analysis	204
11.7 Stable isotope analysis	209
11.8 Conclusions	212
12. Physiology and energetics	213
<i>Jutta Schmid</i>	
12.1 Introduction	213
12.2 Methods of measuring energy expenditure	214
12.3 Measuring body temperature	220
12.4 Ethical implications and legal aspects	223
13. Primate behavioral endocrinology	224
<i>Nga Nguyen</i>	
13.1 Major historical and theoretical developments in wild primate behavioral endocrinology	224
13.2 Applications of non-invasive techniques for monitoring hormones in wild primates	228
13.3 Methodological considerations for field primate behavioral endocrinology	233
13.4 Future directions in the behavioral endocrinology of wild primates	237
14. Population genetics, molecular phylogenetics, and phylogeography	238
<i>Mary E. Blair and Alba L. Morales-Jimenez</i>	
14.1 Introduction	238
14.2 Obtaining samples for genetic analysis	239
14.3 In the laboratory	240
14.4 Data analysis at the species-level	246
14.5 Data analysis at the population-level	248
14.6 Other research questions	256
15. Demography, life histories, and population dynamics	257
<i>Olga L. Montenegro</i>	
15.1 Introduction	257
15.2 Determination of demographic parameters	257
15.3 Life history characteristics	265
15.4 Population dynamics	267
15.5 Modeling extinction risk	275
15.6 Conclusion	277

16. Determining conservation status and contributing to <i>in situ</i> conservation action	278
<i>Mary E. Blair, Nora Bynum, and Eleanor J. Sterling</i>	
16.1 Introduction	278
16.2 Overview of national and global conventions and lists that include primates	278
16.3 Determining conservation status	285
16.4 Conservation action	288
16.5 Conclusion	293
17. Captive breeding and <i>ex situ</i> conservation	294
<i>Dean Gibson and Colleen McCann</i>	
17.1 Introduction	294
17.2 Primate population data sets and sustainability	296
17.3 Recreation, education, and conservation	309
17.4 Research	311
17.5 Re-introduction	311
17.6 Case studies	314
17.7 Conclusion	322
18. Primates in trade	323
<i>Joshua M. S. Linder, Sarah C. Sawyer, and Justin S. Brashares</i>	
18.1 Introduction	323
18.2 Hunter and household surveys	331
18.3 Market surveys	340
18.4 Conclusion	344
19. Conclusion: the future of studying primates in a changing world	346
<i>Eleanor J. Sterling, Nora Bynum, and Mary E. Blair</i>	
Bibliography	351
Index	419
