Section 1 Introduction to Section 1	1
Judith L. Bronstein	
1 The study of mutualism	3
Judith L. Bronstein	
1.1 Introduction	3
1.2 The semantics of mutualism	4
1.2.1 Classifying interactions	4
1.2.2 Defining mutualism	6
1.2.3 Categorizing mutualisms	8
1.2.4 Suggested terminological standards	10
1.3 A history of mutualism studies	11
1.3.1 Mutualism before 1850	11
1.3.2 Mutualism and Darwinism	11
1.3.3 Mutualism in the nineteenth century: political and biological contexts	12
1.3.4 The waning (or flowering?) of mutualism studies	13
1.3.5 Mutualism coalesces as a research field	14
1.3.6 Conceptual synthesis and new themes	15
1.4 This volume, and beyond	17
References	17
2 The special case of symbioses: mutualisms with persistent contact	20
Angela E. Douglas	
2.1 Introduction	20
2.2 Interactions between symbiotic partners	21
2.2.1 The services underpinning reciprocity	21
2.2.2 Byproduct mutualisms	23
2.2.3 Addiction in symbioses	23
Box 2.1 The changing face of <i>Wolbachia</i>	24
Gregory Hurst	
2.3 The persistence of symbioses	26
2.3.1 Open and closed symbioses	26

2.3.2 The resilience of symbioses	26
Box 2.2 The human microbiome	27
John Rawls	
2.4 Partner fidelity and its consequences	29
Box 2.3 Genomic decay and bacterial-derived organelles	31
John McCutcheon	
2.5 Concluding comments	32
References	32

Section 2 Introduction to Section 2 **35**

Judith L. Bronstein

3 Evolutionary origins and diversification of mutualism **37**

George D. Weiblen and Erin L. Treiber

3.1 Webs in the tree of life	37
3.2 Investigating origin and diversification	38
3.2.1 The fossil record	38
Box 3.1 The fossil record of mutualisms	39
Peter Wilf and Conrad C. Labandeira	
3.2.2 Phylogeny estimation	42
3.3 Origins of mutualism	44
3.3.1 Chance and opportunity	44
3.3.2 From antagonism to mutualism and back	45
3.4 Diversification of mutualism	47
3.4.1 Comparing relatives	47
3.4.2 Comparing partners	48
Box 3.2 Phylogenetics in symbiology	50
Jiri Hulcr	
3.5 Innovation and adaptation	51
3.6 Conclusion	52
Acknowledgments	53
References	53

4 Evolutionary models of mutualism **57**

Erol Akçay

4.1 Introduction	57
4.2 Vertical transmission of symbioses	58
Box 4.1 Adaptive dynamics	58
Erol Akçay	
4.3 Population structure and genetic associations	59
4.3.1 The Price equation	60
4.4 Modeling phenotypic feedbacks	62
4.5 Partner choice and beyond: economic theory of mutualism	63
4.5.1 Supply and demand: biological markets	64
4.5.2 The paradox of the market	65
4.5.3 Sanctions: partner choice in the legume-rhizobium symbiosis	65

4.5.4 Control, negotiation, and outside options in mutualisms	66
4.5.5 Screening	68
4.5.6 Economics and mutualisms: a bright future	69
4.6 Evolution and maintenance of diversity in mutualisms	69
4.7 Future directions	70
4.7.1 Integrating mechanisms and modeling approaches	70
Box 4.2 Phenotypic feedbacks and multilevel selection in mutualisms	71
Ellen Simms and Stephanie Porter	
4.7.2 Context dependency	73
4.7.3 Alignment of evolutionary interests	73
4.7.4 Conclusion	74
<i>References</i>	74

10.2.4 Meta-analyses	187

10.3	Eight big questions on context dependency in mutualisms	188
10.3.1	Question 1: What is the relative importance of multiple contextual factors for outcomes of mutualisms, and when do they interact to alter these outcomes?	188
10.3.2	Question 2: Which aspects of biotic context have the most substantial effects on outcomes of mutualisms?	190
10.3.3	Question 3: How do mutualisms shift along gradients of environmental productivity?	191
10.3.4	Question 4: How do mutualisms shift along gradients of diversity?	191
10.3.5	Question 5: Are mutualism outcomes density dependent, and if so, in what manner?	192
10.3.6	Question 6: Are patterns and consequences of context dependency typically similar for both partner species in mutualisms?	193
Box 10.3	The importance of the combined host-symbiont (holobiont) perspective in studies of cnidarian- <i>Symbiodinium</i> mutualisms Tamar L. Goulet	194
10.3.7	Question 7: How important are "cryptic" benefits for outcomes of context-dependent mutualisms?	196
10.3.8	Question 8: How often do outcomes of mutualisms depend on $G \times E$, $G \times G$, and $G \times G \times E$ interactions?	196
