

Contents

<i>Contributors</i>	xiii
1 Modes of reproduction	1
<i>Benjamin B. Normark</i>	
2 Sexual selection theory	20
<i>David M. Shuker</i>	
3 Mating systems	42
<i>Hanna Kokko, Hope Klug, and Michael D. Jennions</i>	
4 The genetics of insect mating systems	59
<i>Michael G. Ritchie and Roger K. Butlin</i>	
5 Reproductive physiology and behaviour	78
<i>Patricia J. Moore</i>	
6 Reproductive contests and the evolution of extreme weaponry	92
<i>Douglas J. Emlen</i>	
7 Alternative phenotypes within mating systems	106
<i>Bruno A. Buzatto, Joseph L. Tomkins, and Leigh W. Simmons</i>	
8 Mate choice	129
<i>John Hunt and Scott K. Sakaluk</i>	
9 The evolution of polyandry	159
<i>Rhonda R. Snook</i>	
10 Sperm competition	181
<i>Leigh W. Simmons</i>	
11 Cryptic female choice	204
<i>Göran Arnqvist</i>	
12 Parental care	221
<i>Per T. Smiseth</i>	

13 Parasites and pathogens in sexual selection	242
<i>Marlene Zuk and Nina Wedell</i>	
14 Sexual selection in social insects	261
<i>Boris Baer</i>	
15 The Evolution of Insect Mating Systems	275
<i>John Alcock and Randy Thornhill</i>
