Preface vii

Acknowledgments xi

Introduction: On Being the Right Size: The Importance
of Size in Life History, Ecology, and Evolution I
Felisa A. Smith and S. Kathleen Lyons

PART I. Body Size Patterns across Space and Time

CHAPTER 1 Macroecological Patterns in Insect Body Size 13
Kevin J. Gaston and Steven L. Chown

CHAPTER 2. Latitudinal Variation of Body Size in Land Snail
Populations and Communities 62
*Jeffrey C. Nekola, Gary M. Barker, Robert A. D.
Cameron, and Beata M. Pokryszko*

CHAPTER 3. Geographic Variation in Body Size Distributions of
Continental Avifauna 83
Brian A. Maurer

CHAPTER 4. Evolution of Body Size in Bats 95
Kamran Safi, Shai Meiri, and Kate E. Jones

CHAPTER 5. Macroecological Patterns of Body Size in Mammals
across Time and Space 116
S. Kathleen Lyons and Felisa A. Smith

PART II.	Mechanisms and Consequences Underlying Body Size Distributional Patterns	
CHAPTER 6.	Using Size Distributions to Understand the Role of Body Size in Mammalian Community Assembly	147
	<i>S. K. Morgan Ernest</i>	
CHAPTER 7.	Processes Responsible for Patterns in Body Mass Distributions	168
	<i>Brian A. Maurer and Pablo A. Marquet</i>	
CHAPTER 8.	The Influence of Flight on Patterns of Body Size Diversity and Heritability	187
	<i>Felisa A. Smith, S. Kathleen Lyons, Kate E. Jones, Brian A. Maurer, and James H. Brown</i>	
CHAPTER 9.	On Body Size and Life History of Mammals	206
	<i>James H. Brown, Astrid Kodric-Brown, and Richard M. Sibly</i>	
Conclusion:	The Way Forward	235
	<i>Felisa A. Smith and S. Kathleen Lyons</i>
