	Introduction	I
1	By Way of Background	19
	Inherited Traits	19
	Inherited Molecules	31
	Practices and Techniques	35
2	Genes, Genomes, and Molecular Genetics	47
	Genes and DNA	47
	DNA	59
	Genetic Knowledges and Their Distribution	67
3	Genomes	75
	What Are Genomes?	75
	The Strange Case of the Epigenome	84
	New Similarities and New Differences	96
	Reducing Complexity	103
4	Genomics and Evolution	111
	Classification	111
	Evolution	121
	Metagenomics	135

5	Genomics and Problems of Explanation	141
	Astrological Genetics and Explanatory Genetics	141
	Heritability	144
	Astrological Genomics	153
	Beyond Astrology	163
6	Genomics as Power	173
	Accumulating Powers	173
	Genomics and Social Powers	181
	Resisting Genomic Powers	188
	Arguments and Institutions	197
7	Natural Order and Human Dignity	207
	The Order of Things	207
	Dignity	214
	Human Genomes and the Order of Things	220
	Human Genomes and the Dignity of Human Life	229
	Arguments and Institutions Again	234
8	Conclusions	243
	Genomics as Power Again	243
	Accounting for Exceptionalism	246
	Life without Essences: Reduction as Emancipation	252
	Bibliography	259
	Index	267
