

CONTENTS

1. Introduction / 1

Karl S. Matlin, Jane Maienschein, and Manfred D. Laubichler

2. Changing Ideas about Cells as Complex Systems / 15

Jane Maienschein

3. In Search of Cell Architecture:

General Cytology and Early Twentieth-Century Conceptions
of Cell Organization / 46

Andrew Reynolds

4. Methodological Reflections in *General Cytology* in Historical Perspective / 73

Jutta Schickore

5. Cellular Pathogenesis: Virus Inclusions and Histochemistry / 100

William C. Summers

6. The Age of a Cell:

Cell Aging in Cowdry's *Problems of Ageing* and Beyond / 115

Lijing Jiang

7. Visualizing the Cell:

Pictorial Styles and Their

Epistemic Goals in *General Cytology* / 134

Beatrice Steinert and Kate MacCord

8. Thomas Hunt Morgan and the Role of Chromosomes in Heredity / 156

Garland E. Allen

9. Epigenetics and Beyond / 183

Jan Sapp

10. Heads and Tails:

Molecular Imagination and the Lipid Bilayer, 1917-1941 / 209

Daniel Liu

11. Pictures and Parts:

Representation of Form and the Epistemic Strategy of Cell Biology / 246

Karl S. Matlin

12. Observing the Living Cell:

Shinya Inoué and the Reemergence of Light Microscopy / 280

Rudolf Oldenbourg

13. Enriching the Strategies for Creating Mechanistic

Explanations in Biology / 301

William Bechtel

14. Updating Cowdry's Theories:

The Role of Models in Contemporary Experimental
and Computational Cell Biology / 326

Fridolin Gross

Acknowledgments / 351

List of Contributors / 353

Index / 355
