

Contents

Preface ix

- 1 Introduction and a Brief Phylogenetics Primer 1
- 2 Phylogenetic Nonindependence, Comparative Ecology, and Phylogenetic Conservatism 20
- 3 The Measurement of Phylogenetic Diversity 43
- 4 Community Assembly: Phylogenies as a Proxy 73
- 5 Community Assembly: Phylogenies as a Backbone 104
- 6 Global Patterns of Biodiversity, Diversification, Conservatism, and Priority 126
- 7 Functional Phylogenomics for Ecology 141
- 8 Building Trees for Every System and Scale and Biodiversity Informatics 162
- 9 Conclusions and Remodeling Phylogenetic Ecology 183
