

## CONTENTS

### PREFACE xi

The Phenomenon of Dual Sexuality xi

Hermaphroditism in Fiction xii

Hermaphroditism in the Real World xiv

### ONE Two Sexes in One 1

Maleness and Femaleness 4

Anisogamy and the Separate-sex Condition 7

*Evolutionary Origins* 8

*Evolutionary Ramifications* 11

Sex Ratios in Separate-sex Taxa 19

*Relationship to Sexual Selection and Mating Systems* 20

*Impact on Demographic Parameters* 26

Sex Ratios in Hermaphroditic Taxa 28

Hermaphroditism Versus Separate Sexes 30

*Fitness Considerations* 30

*Mating Systems and Related Phenomena* 32

*Sex Allocation* 34

*Phylogenetic Legacy Versus Contemporary Adaptive Significance* 36

Summary 41

**TWO Dual-sex Plants 43**

- Terminology 44
- Alternative Sexual Systems: Natural History and Examples 47
  - Hermaphroditism* 47
  - Monoecy* 51
  - Andromonoecy* 51
  - Gynomonoecy* 52
  - Gynodioecy* 53
  - Androdioecy* 54
  - Trioecy* 55
  - Sex-changers* 56
  - Dioecy* 58
- Cosexuality Versus Dioecy 58
  - Ecological Considerations* 59
  - Phylogenetic Character Mapping* 60
  - Transitional States* 63
  - An Evolutionary Enigma* 68
- Selfing Versus Outcrossing 69
  - Inbreeding* 70
  - Coadapted Genotypes* 73
  - Fertilization Insurance* 75
  - Sex Allocation* 76
- Sexual Selection in Plants 78
- Summary 79

**THREE Dual-sex Invertebrates 81**

- Biological Examples 83
  - Reef-building Corals* 83
  - Love-dart Snails, Earthworms, and Sea Slugs* 83
  - Sperm-storing Freshwater Snails* 89
  - Sex-changing Limpets, Isopods, and Polychaetes* 91
  - Androdioecious Clam Shrimps and Gynodioecious Sea Anemones* 92
  - Protandric Simultaneously Hermaphroditic Shrimps* 93
  - Quasi-asexual Flatworms* 95
  - Other Oddities* 95
- Sex Determination and Pseudohermaphroditism 96
- Evolutionary Histories: Gonochorism and Hermaphroditism 97
  - Phylogenetic Character Mapping* 97
  - Gynodioecy and Androdioecy* 100
  - Genetics* 101
  - Selective Pressures* 102
