

CONTENTS

Foreword
W. John Kress xi

Preface xvii

Acknowledgments xxi

PART ONE. INTRODUCTION: REPLICATION ACROSS DISCIPLINES

1. Toward a Taxonomy of Scientific Replication
Ayelet Shavit and Aaron M. Ellison 3
2. Borges on Replication and Concept Formation
Yemima Ben-Menahem 23
3. The Historical Emergence of Replication: Reifying Geography
through Repeated Surveys
Haim Goren 37

PART TWO. REPLICATION IN BIOLOGY: OVERVIEWS AND
CASE STUDIES

The Value of Natural History Collections

4. Natural History Collections as Dynamic Research Archives
Tamar Dayan and Bella Galil 55
5. Looking to the Past to Plan for the Future: Using Natural
History Collections as Historical Baselines
Rebecca J. Rowe 64

Repeatable Monitoring and Observations

6. Monitoring: Repeated Sampling for Understanding Nature
Avi Perevolotsky, Naama Berg, Orit Ginzburg, and Ron
Drori 83
7. Monitoring the State of Nature in Israel
Ron Drori, Naama Berg, and Avi Perevolotsky 94
8. Creating Coherent Time Series through Repeated
Measurements in a Marine Monitoring Program
Yonathan Shaked and Amatzia Genin 112

Replication and Experiments

9. Contingent Repeatability of Experiments in Time and Space
Aaron M. Ellison 125
10. The Influence of Variation among Replicates on
Repeatability
Jacob Pitcovski, Ehud Shahaar, and Avigdor Cahaner 139

Meta-analysis and the Need for Repeatability

11. Replication and Repetition in Systematic Reviews and Meta-
analyses in Medicine
Leonard Leibovici and Mical Paul 157

12. Clinical Heterogeneity in Multiple Trials of the Antimicrobial Treatment of Cholera
Mical Paul, Ya'ara Leibovici-Weissman, and Leonard Leibovici 163

The Role of Metadata in Creating Reproducible Research

13. Reliable Metadata and the Creation of Trustworthy, Reproducible, and Re-usable Data Sets
Kristin Vanderbilt and David Blankman 179
14. Replication of Data Analyses: Provenance in R
Emery R. Boose and Barbara S. Lerner 195

PART THREE. INTEGRATION AND SYNTHESIS

15. Turning Oranges into Apples: Using Detectability Correction and Bias Heuristics to Compare Imperfectly Repeated Observations
Morgan W. Tingley 215
16. Dissecting and Reconstructing Time and Space for Replicable Biological Research
Barbara Helm and Ayelet Shavit 233
17. Best Practices for Creating Replicable Research
Aaron M. Ellison 250

Epilogue: A Chorus's Dance with Replication
Ayelet Shavit 265

Bibliography 271
