

## CONTENTS

Preface vii

Acknowledgments xiii

- 1 | The Brainless Majority: Sensing the Environment in Organisms without Brains 1
- 2 | Brains and Prains: Brains (or Not) in Animals from Sponges to Us 15
- 3 | The Monkey's Unculus: Tactile and Balance Sensory Capacity in Animals 27
- 4 | A Matter of Taste (and Odorant) Receptors: Smell and Taste Reception in Animals 41
- 5 | All Ears (and Eyes): Animal Hearing and Sight 57
- 6 | Supersmellers and Supertasters: The Limits of Smell and Taste in Humans 66
- 7 | Where Am I? The Limits of Hearing and Balance in Humans 85
- 8 | Touchy Feely: Touch and How It Is Linked to Other Senses 99

|    |                                                                                                        |     |
|----|--------------------------------------------------------------------------------------------------------|-----|
| 9  | The Eyes Have It: The Limits of Sight in Humans                                                        | 108 |
| 10 | Accidents Will Happen: Traumatic Brain Injury and the Impact on Our Senses                             | 122 |
| 11 | Modern Life, Strokes, and the Senses: The Impact of Strokes and Other Brain Damage on Sensory Capacity | 139 |
| 12 | Full/Half/Split Brains: People with Unique Brains                                                      | 149 |
| 13 | Team of Rivals Meets the Kluge: Making Sense Out of Crossmodal Stimuli from the Outer World            | 160 |
| 14 | Neural Detritus: Making Sense Out of a Noisy Environment                                               | 172 |
| 15 | Panica' Meusa, Crème Brûlée, and Synesthesia: Crossmodal Impact on Taste and Synesthesia               | 185 |
| 16 | Connectomes: How Crossmodal Interactions Work in the Brain                                             | 205 |
| 17 | Faces and Hallucinations: Facial Recognition and Hallucinations as Subjects in Higher Perception       | 217 |
| 18 | Bob Dylan's Nobel: Language, Literacy, and How the Senses Interact to Produce Literature               | 230 |
| 19 | Facing the Music: The Neurobiology of Music and Art                                                    | 241 |
| 20 | No Limits: The Limits to What We Can Sense and the Future of Our Senses                                | 256 |
|    | Literature and Further Reading                                                                         | 265 |
|    | Index                                                                                                  | 281 |
