

Contents

Preface	vii
Contributors and Editors	ix
1. Sustainability of Resources in Large Marine Ecosystems, <i>Kenneth Sherman</i>	1
2. A Carbon Budget for the Northeast Continental Shelf Ecosystem: Results of the Shelf Edge Exchange Process Studies, <i>Paul G. Falkowski</i>	35
3. Warm-Temperate Food Chains of the Southeast Shelf Ecosystem, <i>James A. Yoder</i>	49
4. Continental Shelf Food Chains of the Northern Gulf of Mexico, <i>M. Dagg, C. Grimes, S. Lohrenz, B. McKee, R. Twilley, and W. Wiseman, Jr.</i>	67
5. Resource Productivity and Fisheries Management of the Northeast Shelf Ecosystem, <i>M. P. Sissenwine and E. B. Cohen</i>	107
6. Biomass, Yield Models, and Management Strategies for the Gulf of Mexico Ecosystem, <i>Bradford E. Brown, Joan A. Browder, Joseph Powers, and Carole D. Goodyear</i>	125
7. Spatial-Temporal Scales and Secondary Production Estimates in the California Current Ecosystem, <i>Michael M. Mullin</i>	165
8. The State of the Main Commercial Species of Fish in the Changeable Barents Sea Ecosystem, <i>V. M. Borisov</i>	193
9. Predictive Yield Models and Food Chain Theory, <i>A. A. Rosenberg, M. Basson, and J. R. Beddington</i>	205

10. Adaptive Strategies for Management of Fisheries Resources in Large Marine Ecosystems, <i>Jeremy S. Collie</i>	225
11. Empirical and Theoretical Aspects of Fisheries Yield Models for Large Marine Ecosystems, <i>Marc Mangel</i>	243
12. On the Causes for Variability of Fish Populations: The Linkage Between Large and Small Scales, <i>Brian J. Rothschild</i>	263
13. Global Epidemic of Noxious Phytoplankton Blooms and Food Chain Consequences in Large Ecosystems, <i>Theodore Smayda</i>	275
Index	309
