Chapter 1 Spectrum of Physiological and Molecular Responses in Plant Salinity Stress Tolerance	1
<i>Insha Amin, Aditya Banerjee, Abbu Zaid, Mudasir A. Mir, Shabir H. Wani, Nazeer Ahmed, Aryadeep Roychoudhury, and Khalid Z. Masoodi</i>	
Chapter 2 Root Plasticity under Low Phosphate Availability: A Physiological and Molecular Approach to Plant Adaptation under Limited Phosphate Availability	13
<i>Loitongbam Lorinda Devi, Anshika Pandey, and Amar Pal Singh</i>	
Chapter 3 The Role of Sugars in Improving Plant Abiotic Stress Tolerance.....	31
<i>Pooja Sharma, Priya Arora, Dhriti Kapoor, Kanika Khanna, Pardeep Atri, Ravinder Singh Bali, Rupinder Kaur, Abhishek Walia, and Renu Bhardwaj</i>	
Chapter 4 Glutathione Is a Key Component in Abiotic Stress Responses.....	49
<i>Sajid Ali Khan Bangash and Krisztina Bela</i>	
Chapter 5 Improving Heavy Metal Tolerance through Plant Growth Regulators and Osmoprotectants in Plants.....	69
<i>Farha Ashfaq, Samreena Farooq, Priyanka Chopra, Himanshu Chhillar, and M. Iqbal R. Khan</i>	
Chapter 6 Role of Osmolytes in Regulation of Growth and Photosynthesis under Environmental Stresses	99
<i>Rayees Ahmad Mir, Surendra Argal, and Mohammad Abass Ahanger</i>	
Chapter 7 Role of Exogenous Salicylic Acid in Drought-Stress Adaptability in a Changing Environment	119
<i>Cátia Brito, Lia-Tânia Dinis, José Moutinho-Pereira, and Carlos Correia</i>	
Chapter 8 Role of Nitric Oxide in Plant Abiotic Stress Tolerance.....	131
<i>Gábor Feigl, Árpád Molnár, Dóra Oláh, and Zsuzsanna Kolbert</i>	
Chapter 9 Role of Jasmonates in Plant Abiotic Stress Tolerance.....	155
<i>Péter Poór, Zsolt Czékus, and Attila Ördög</i>	

Chapter 10	Emerging Trends of Proline Metabolism in Abiotic Stress Management.....	177
	<i>Sukhmeen Kaur Kohli, Vandana Gautum, Shagun Bali, Parminder Kaur, Anket Sharma, Palak Bakshi, Bilal Ahmad Mir, and Renu Bhardwaj</i>	
Chapter 11	Networking by Small Molecule Hormones during Drought Stress in Plants	203
	<i>Riddhi Datta, Salman Sahid, and Soumitra Paul</i>	
Chapter 12	Aquaporins: A Promising Gene Family for Tackling Stresses for Crop Improvement.....	229
	<i>Rahul B. Nitnavare, Aishwarya R. Shankhapal, Momina Shanwaz, Pooja Bhatnagar-Mathur, and Palakolanu Sudhakar Reddy</i>	
Chapter 13	The Role of Extracellular ATP in Plant Abiotic Stress Signaling	247
	<i>Sushma Sagar and Amarjeet Singh</i>	
Chapter 14	Phospholipase C in Abiotic Stress-Triggered Lipid Signaling in Plants	257
	<i>Sushma Sagar and Amarjeet Singh</i>	
Chapter 15	Role of Silicon in Abiotic Stress Tolerance of Plants.....	271
	<i>Rakeeb Ahmad Mir, Kaisar A. Bhat, A.A. Shah, and Sajad Majeed Zargar</i>	
Chapter 16	Genomics Approaches in Plant Stress Research.....	291
	<i>A.T. Vivek and Shailesh Kumar</i>	
Chapter 17	High-Throughput Genomics: Application in Plant Breeding under Abiotic Stress Conditions.....	309
	<i>Aditya Banerjee and Aryadeep Roychoudhury</i>
