

Contents

<i>Foreword</i>	v
<i>Preface</i>	vii
<i>List of Contributors</i>	xi
1. Exploring Microbes from Extreme Environments for Crop Productivity and Environmental Sustainability	1
<i>Jeyabalan Sangeetha, Purushotham Prathima, Devarajan Thangadurai, Muniswamy David, Abhishek Mundaragi, Shrinivas Jadhav</i>	
2. Rhizomicrobiome – A Biological Software to Augment Soil Fertility and Plant Induced Systemic Tolerance Under Abiotic Stress	25
<i>Jegan S., Baskaran V., Ganga V., Kathiravan, R. and Prabavathy V.R.</i>	
3. Bioconversion of Municipal Solid Waste and its Use in Soil Fertility	55
<i>Poonam Verma and Jamaluddin</i>	
4. Microorganisms for Abiotic Stress Management in Crop Plants: Recent Developments in India	69
<i>Minakshi Grover, Venkateswarlu B., Desai S., Yadav S.K. Maheswari M. and Srinivasa Rao Ch</i>	
5. Endurance to Stress: An Insight into Innate Stress Management Mechanisms in Plants	81
<i>Krishna Sundari Sattiraju and Srishti Kotiyal</i>	
6. Plant Growth Promoting Microbes: Potential Tool for Growth and Development of Plants in Abiotic Stress Environments	119
<i>Hruda Ranjan Sahoo and Nibha Gupta</i>	
7. Endophytes and Their Possible Roles in Plant Stress Management	145
<i>Sanjay K. Singh</i>	

8. Application of Endophytic Microorganisms for Alleviation of Abiotic Stresses in Crop Plants	161
<i>Kamal, K. Pal and Rinku Dey</i>	
9. The Role of Arbuscular Mycorrhizal Fungi in Salt and Drought Stresses	183
<i>Padmavathi Tallapragada</i>	
10. Effect of Arbuscular Mycorrhizal Fungi and Abiotic Stress on Growth and Productivity of Important Cash Crops	205
<i>Shinde, B.P.</i>	
11. Arbuscular Mycorrhizal Fungi: Role in Alleviating Salt Stress in Crop Plants	221
<i>Muthukumar T., Bagyaraj, D.J. and Ashwin R.</i>	
12. Contribution of AMF in the Remediation of Drought Stress in Soybean Plants	245
<i>Abhishek Bharti, Shivani Garg, Anil Prakash and Mahaveer P. Sharma</i>	
13. Microbial Bioinoculants for Quality Seedling Production in Forestry	267
<i>Parkash Vipin, Saikia A.J. and Saikia M.</i>	
14. Microbial Synthesis of Nanoparticles for Use in Agriculture Ecosystem	301
<i>Tarafdar J.C. and Indira Rathore</i>
