

TABLE OF CONTENTS

Chapter 1	
Protoplasts as Tools in the Study of Moss Development.....	1
Neil W. Ashton, Philip J. Boyd, David J. Cove, and Celia D. Knight	
Chapter 2	
Mutants as Tools for the Analytical Dissection of Cell Differentiation in <i>Physcomitrella patens</i> Gametophytes.....	17
Neil W. Ashton and David J. Cove	
Chapter 3	
Photomodulation of Protonema Development.....	33
Elmar Hartmann and Martina Weber	
Chapter 4	
Hormones of the Moss Protonema.....	55
Martin Bopp	
Chapter 5	
Growth Regulating Substances in Mosses.....	79
Satish C. Bhatla and Sadhana Dhingra-Babbar	
Chapter 6	
Calcium and Cytokinin in Mosses.....	103
M. J. Saunders	
Chapter 7	
Physiology of Moss-Bacterial Associations.....	119
Loretta D. Spiess, Barbara B. Lippincott, and James A. Lippincott	
Chapter 8	
Sexual Reproduction in Bryophytes in Relation to Physical Factors of the Environment.....	139
R. E. Longton	
Chapter 9	
<i>In Vitro</i> Studies on Chemical Regulation of Gametangial Formation in Bryophytes.....	167
R. N. Chopra and Sarla	
Chapter 10	
Induction and Controlled Differentiation of Callus in Mosses.....	191
M. K. C. Menon and M. Lal	
Chapter 11	
Growth and Secondary Metabolite Production in Cultured Cells of Liverworts.....	209
Yoshimoto Ohta, Kenji Katoh, and Reiji Takeda	

Chapter 12	
Morphoregulatory Role of Hydroxyproline-Containing Proteins in Liverworts.....	225
Dominick V. Basile	
Chapter 13	
Lunularic Acid in Growth and Dormancy of Liverworts	245
W. W. Schwabe	
Chapter 14	
Biologically Active Substances from Bryophytes.....	259
Yoshinori Asakawa	
Index	289
