
Contents

Preface.....	xi
Acknowledgments.....	xv
Authors.....	xvii
List of Figures.....	xix
List of Tables.....	xxi
Abbreviations.....	xxiii

Chapter 1	Reaching Backwards.....	1
	Reviving the "Dead".....	1
	How Ice Affects Life.....	4
Chapter 2	Questions and Answers.....	9
	Enigmas.....	9
	Frozen Knowledge.....	9
	Evolutionary Implications.....	11
	Applications.....	12
	Extraterrestrial Life.....	12
	Moving Forward.....	13
Chapter 3	The Importance of Water and Ice.....	15
	Liquid and Solid Water.....	15
	What Is in That Water?.....	17
	Why Are Water and Ice So Important for Life?.....	17
	Ice as a Microbial Archive.....	20
	Preservation of Microbes in Glaciers.....	21
	Microbes and Aliens.....	23
Chapter 4	The Diversity of Ice.....	25
	Snow and Ice Diversity.....	25
	Glaciers.....	27
	Ice Fields and Domes.....	32
	Lake and Sea Ice.....	32
	Surface and Subglacial Lake Ice.....	33

Chapter 5	Permafrost	37
	Frozen Soils.....	37
	Life in Permafrost.....	37
	Release of Greenhouse Gases and Other Chemicals.....	41
Chapter 6	What Is Life?	43
	What Is Causing the Disease?	43
	Microbes in Ice.....	44
	Classification of Life	46
Chapter 7	Fossils: Marking Time	53
	Reading Fossils.....	53
	Fossils in Ice.....	54
	Living Fossils	55
	How Old?	56
	Ancient Biomolecules	59
	Problems with Degradation.....	60
	Real or Imagined?	61
Chapter 8	Walking into the Past	63
	Obtaining the Core Sections.....	63
	Storage.....	64
	What to Look For	66
	Decontamination	70
	Most Effective Methods	74
Chapter 9	Isolating and Characterizing Microbes from Ice	79
	How to Study Life	79
	Culture Methods.....	79
	Nucleic Acid Methods.....	80
	Metagenomics, Metatranscriptomics, and Genomics.....	83
	Other Methods.....	86
Chapter 10	A Brief History of Research on Life in Ice	89
	Longevity.....	89
	A Brief History.....	92
	International Geophysical Year and Beyond	98
	Serendipity Strikes	101

Chapter 11	Ice Core Discoveries.....	107
	All Ice Is Not the Same	107
	IGY	107
	1950's and 1960's.....	108
	1970's	110
	1980's	111
	1990's	112
	2000's	116
	2010's	118
	Future	120
Chapter 12	Subglacial Lake Vostok.....	123
	Walking on Thick Ice	123
	Initial Characterization of the Vostok Ice Core	125
	Bacteria in the Lake.....	128
	Metagenomics and Metatranscriptomics.....	130
	Metabolic Processes	131
	Eukaryotes in Lake Vostok	132
	Lake Water Sampling	133
Chapter 13	Discoveries from Other Ice-Covered Lakes.....	135
	Subglacial Environments.....	135
	Surface Lake Ice.....	139
Chapter 14	Life Is Everywhere	143
	Hard Times	143
	Adaptable Species in Ice	144
	Sensitivity to Freezing, Thawing, and Temperature.....	146
	Pressure Tests	147
	Other Adaptations.....	147
	Anabiosis and Spores	148
	Yeasts and Filamentous Fungi.....	149
	Bacteria in Permafrost.....	151
	Viruses	152
Chapter 15	Pathogens in the Environment: Viruses.....	157
	Exposure to Pathogens	157
	Influenza A	158
	Other Viruses	160

	Ice as a Virus Reservoir	161
	Ice Cubes to Glaciers.....	163
	Don't Eat That Ice	163
	Detecting Viruses Emerging from Ice	164
Chapter 16	Pathogens, Hazards, and Dangers	167
	Pathogens.....	167
	Bacteria.....	168
	Archaea.....	170
	Eukarya.....	171
	Hazards and Dangers.....	174
Chapter 17	Everything Old Is New Again, the Ultimate in Recycling.....	179
	An Unfortunate Accident.....	179
	Stops and Starts of Life	180
	Glacial Cycles.....	181
	The 1918 Influenza A Pandemic	183
	Pathogen Cycling	183
	Mutation Rates, Gene Flow, and Populations	184
	Implications	187
Chapter 18	Astrobiology—Out of This World	189
	Probing the Solar System	189
	Seeking Signs of Life	190
	Where in the Solar System to Look?.....	192
	Inner Planets.....	192
	The Moon	193
	Mars.....	193
	Ceres.....	194
	Jupiter and Its Moons	195
	Saturn and Its Moons.....	196
	Uranus and Its Moons.....	197
	Neptune and Its Moons.....	198
	Pluto and Its Moons.....	198
	A Question of Life.....	198
Chapter 19	Disappearing Ice—Global Climate Change	201
	Pollution and Melting.....	201
	Receding Glaciers and Ice Shelves	203
	Greenhouse Effect	206
	Misconceptions.....	207

Global Climate and Hominins	209
Other Planets and the Future of Earth	211
Plusses and Minuses	213
Chapter 20 Epilogue	217
Ignoring the Dangers	217
Pathogens, Epidemics, and Pandemics	218
Microbial Survival	220
Preservation of Species, and Extinctions	220
Subglacial Environments	221
A Look into the Future	222
Index	225
