

Contents

Preface

List of Plates

1. Plants, Taxonomy and Systematics

Plants and Kingdoms of Life

Two Kingdom System

Two Empires Three Kingdoms

Five Kingdom System

Six or Seven Kingdoms?

The Plant Kingdom

Taxonomy and Systematics

Basic Components (Principles) of Systematics

Aims of Systematics

Advancement Levels in Systematics

2. Descriptive Terminology

Habit and Life Span

Habitat

Roots

Stems

Leaves

Leaf Arrangement (Phyllotaxy)

Leaf Duration

Leaf Incision/Type of Leaves

Stipules

Leaf Shape (Outline of Lamina)

Leaf Margin

Leaf Base

Leaf Apex

Leaf Surface

Venation

Inflorescence

Racemose Types

Cymose Types

Specialized Types

Flower

Calyx

Corolla

Perianth

Androecium	27
Gynoecium	29
Fruits	31
Simple Fruits	32
Aggregate Fruits	33
Multiple (Composite) Fruits	34
Floral Formula	34
Floral Diagram	34
3. Process of Identification	40
Specimen Preparation	40
Fieldwork	40
Equipment	40
Collection	41
Pressing	42
Handling Special Groups	42
Drying	43
Herbarium Methods	43
Botanical Gardens	43
Herbaria	48
Pest Control	51
Virtual Herbarium	52
Identification Methods	54
Taxonomic Literature	54
Taxonomic Keys	58
Guidelines for Dichotomous Keys	60
Multi-Access Keys (Polyclaves)	61
Computers in Identification	63
Interactive Keys	64
DNA Barcoding	68
4. Taxonomic Evidence	69
Morphology	69
Habit	69
Underground Parts	69
Leaves	70
Flowers	70
Fruits	70
Anatomy	70
Wood Anatomy	70
Trichomes	71
Epidermal Features	71
Leaf Anatomy	71
Floral Anatomy	72
Embryology	73
Families Marked Out by Distinct Embryological Features	73
Specific Examples of the Role of Embryological Data	73
Palynology	74
Pollen Aggregation	74
Pollen Wall	75
Pollen Aperture	75

Micromorphology and Ultrastructure

Micromorphology

Ultrastructure

Chromosomes

Chromosomal Number

Chromosomal Structure

Chromosomal Behavior

Chemotaxonomy

Primary Metabolites

Secondary Metabolites

Non-semantic Macromolecules

Proteins

Molecular Systematics

Molecular Evolution

Location of Molecular Data

Molecular Techniques

DNA Cleaving

DNA Cloning

Amplification through PCR

DNA Libraries

Gene Mapping

Gene Sequencing

Analysis of Sequence Data

DNA Polymorphism

Examples of Molecular Studies

Species Trees vs. Gene Trees

5. Hierarchical Classification**Taxonomic Groups, Categories and Ranks****Utilization of Categories**

Species Concept

Intraspecific Ranks

Genus

Family

6. Botanical Nomenclature**Need for Scientific names**

Why Latin?

Development of Botanical Code**Contents of Botanical Code**

Preamble

Principles of ICBN

Names of Taxa

The Type Method

Author Citation

Publication of Names

Rejection of Names

Principle of Priority

Starting Dates

Not Above Family Rank

Not Outside the Rank

Nomina Conservanda

Names of Hybrids	137
Names of Cultivated Plants	138
Unified Biological Nomenclature	138
Draft BioCode	139
PhyloCode	140
7. Variation, Biosystematics, Population Genetics and Evolution	146
Types of Variation	146
Developmental Variation	146
Environmental Variation	147
Genetic Variation	147
Variance Analysis	147
Reproductive Systems	149
Outbreeding	149
Introgressive Hybridization	150
Inbreeding	151
Apomixis	152
Population Genetics	152
Allele Frequencies	152
Mating Systems	153
Hardy-Weinberg Law	153
Evolution	155
Mutation	155
Migration	156
Random Genetic Drift	156
Natural Selection	157
Molecular Evolution	158
Neutral Theory of Evolution	158
Speciation	159
8. Numerical and Cladistic Methods	163
Numerical (Phenetic) Methods	163
Principles of Taxometrics	164
Cladistic Methods	165
Phylogenetic Terms	165
Phylogenetic Diagrams	171
Phylogeny and Classification	173
Phylogenetic Data Analysis	176
Taxa-Operational Units	176
Characters	176
Measure of Similarity	180
Construction of Trees	183
Parsimony-based Methods	183
Multiple Trees	185
Cluster Analysis	187
Ordination	191
The Consensus Tree	193
Consistency Index	194
Retention Index	194
Bremer Support (Decay Index)	195
Bootstrap Analysis	195
Effect of Different Outgroups	196

Effect of Lineage Removal	196
Effect of Exemplars	197
Automated Trees	197
Developing Classification	200
9. Phylogeny of Angiosperms	202
<i>Origin of Angiosperms</i>	202
What are Angiosperms?	202
What is the Age of Angiosperms?	202
What is the Place of their Origin?	205
Are Angiosperms Monophyletic or Polyphyletic?	205
What are the Possible Ancestors?	206
Cycadeoidales (Bennettitales)	206
Caytoniaceae	206
Cycadales	208
Origin of Monocotyledons	212
<i>Basal Living Angiosperms</i>	213
Casuarinaceae	213
Magnoliids	213
Paleoherbs	216
<i>Evolutionary Trends</i>	218
Coevolution with Animals	218
Basic Evolutionary Trends	219
Xylem Evolution	220
Stamen Evolution	221
Pollen Grain Evolution	222
Carpel Evolution	223
Evolution of Inferior Ovary	226
10. Systems of Classification	227
<i>Classifications Based on Gross Morphology</i>	227
Preliterate Mankind	227
Early Literate Civilizations	227
Theophrastus—Father of Botany	227
Parasara—Indian Scholar	228
Caius Plinius Secundus—Pliny the Elder	228
Medieval Botany	229
Renaissance	229
<i>Sexual System</i>	231
Carolus Linnaeus—Father of Taxonomy	231
<i>Natural Systems</i>	234
Michel Adanson (1727–1806)	234
Jean B. P. Lamarck (1744–1829)	234
de Jussieu Family	234
de Candolle Family	235
Robert Brown (1773–1858)	235
George Bentham & Sir J. D. Hooker	236
<i>Phylogenetic Systems</i>	239
Transitional Systems	239
Intentional Phylogenetic Systems	242
Modern Phylogenetic Systems	247
Angiosperm Phylogeny Group (APG)	264

11. Families of Pteridophytes	274
Classification	274
Classification of Smith et al.	274
Pteridophyte Phylogeny Group PPG I	275
Consensus classification of Pteridophytes	275
Lycopodiopsida	
Lycopodiaceae	278
Selaginellaceae	279
Isoetaceae	280
Polypodiopsida	
Ophioglossaceae	280
Psilotaceae	281
Equisetaceae	282
Osmundaceae	283
Marsileaceae	284
Salvinaceae	285
Cyatheaceae	286
Pteridaceae	287
Aspleniaceae	288
Dryopteridaceae	289
Polypodiaceae	289
12. Families of Gymnosperms	291
Cycadales	
Cycadaceae	293
Zamiaceae	294
Ginkgoales	
Ginkgoaceae Engler	295
Coniferales	
Pinaceae	296
Cupressaceae	297
Podocarpaceae	298
Araucariaceae	299
Taxaceae	300
Gnetales	
Ephedraceae	300
Gnetaceae	301
13. Major Families of Angiosperms	307
Angiosperms Roll of Honor	308
Basal Angiosperms	
Amborellaceae	308
Cabombaceae	310
Nymphaeaceae	311
Austrobaileyaceae	313
Schisandraceae	314
Magnoliids	
Winteraceae	315
Saururaceae	317
Piperaceae	318
Magnoliaceae	319
Degeneriaceae	321
Annonaceae	322

Calycanthaceae	323
Lauraceae	324
Unplaced Independent Lineage	
Chloranthaceae	325
Monocots	
Acoraceae	327
Araceae	329
Alismataceae	330
Butomaceae	331
Hydrocharitaceae	332
Potamogetonaceae	334
Dioscoreaceae	335
Pandanaceae	336
Smilacaceae	337
Liliaceae	338
Orchidaceae	340
Iridaceae	341
Asphodelaceae	343
Amaryllidaceae	344
Asparagaceae	347
Arecaceae	349
Commelinaceae	350
Musaceae	351
Cannaceae	352
Zingiberaceae	354
Juncaceae	355
Cyperaceae	356
Poaceae	358
Probable sister to Eudicots	
Ceratophyllaceae	366
Eudicots	
Papaveraceae	367
Berberidaceae	369
Ranunculaceae	370
Eudicots	
Dilleniaceae	372
Superrosids	
Paeoniaceae	373
Saxifragaceae	374
Rosids	
Zygophyllaceae	377
Fabaceae	379
Faboideae	379
Caesalpinioideae	380
Mimosoid Clade of Caesalpinioideae	381
Rosaceae	383
Rhamnaceae	384
Ulmaceae	386
Moraceae	387
Urticaceae	388
Fagaceae	390
Casuarinaceae	391

Betulaceae	392
Cucurbitaceae	394
COM Clade	395
Celastraceae	395
Oxalidaceae	396
Clusiaceae	398
Violaceae	399
Salicaceae	401
Rafflesiaceae	402
Euphorbiaceae	403
Rosids (continued)	405
Geraniaceae	405
Lythraceae	406
Onagraceae	408
Myrtaceae	409
Anacardiaceae	411
Sapindaceae	412
Rutaceae	413
Meliaceae	415
Malvaceae	416
Dipterocarpaceae	419
Capparaceae	420
Cleomaceae	422
Brassicaceae	423
Superasterids	437
Polygonaceae	439
Droseraceae	440
Caryophyllaceae	441
Amaranthaceae	442
Amaranth Complex	443
Chenopod Complex	444
Aizoaceae	445
Nyctaginaceae	447
Portulacaceae	448
Cactaceae	450
Asterids	452
Hydrangeaceae	453
Cornaceae	454
Balsaminaceae	456
Polemoniaceae	457
Sapotaceae	458
Ebenaceae	459
Primulaceae	461
Ericaceae	462
Rubiaceae	464
Apocynaceae	466
Boraginaceae	467
Convolvulaceae	468
Solanaceae	470
Plantaginaceae	471
Scrophulariaceae	
Acanthaceae	

Bignoniaceae	473
Verbenaceae	474
Lamiaceae	475
Asteraceae	477
Adoxaceae	479
Araliaceae	480
Apiaceae	482
