

Contents

- 1 Introduction: Neuroethology, Perception, and Cognition, *Sara J. Shettleworth* 1

PART ONE

Specializations in Learning

- 2 Specializations in Honey Bee Learning, *James L. Gould* 11
- 3 Detecting Associations in Pavlovian Conditioning and Instrumental Learning in Vertebrates and in Invertebrates, *Ruth M. Colwill* 31
- 4 Neuroethological Studies on How Birds Discriminate Song, *Jeffrey Cynx* 63
- 5 Ecological Specialization in the Avian Brain, *Susan D. Healy* 84

PART TWO

Specializations for Perception of Biologically Relevant Stimuli

- 6 The Perceptual Foundations of Vocal Learning in Budgerigars, *Robert J. Dooling, Susan D. Brown, Kazuchika Manabe, and Elizabeth F. Powell* 113
- 7 How Birds Use Frequency to Recognize Their Songs, *Daniel M. Weary* 138
- 8 Development of Perceptual Mechanisms in Birds: Predispositions and Imprinting, *Johan J. Bolhuis* 158
- 9 Neural Codes for "Pitch" Processing in a Unique Vertebrate Auditory System, *Andrea M. Simmons and Rebecca C. Buxbaum* 185

- 10 Recognition of Visual Signals: Eyes Specialize,
Russell D. Fernald 229

PART THREE

Specializations for Spatial Perception and Orientation

- 11 Perception Along the Axis of Target Range in the
Echolocating Bat, Cynthia F. Moss and James A. Simmons 253
- 12 Converging Approaches to Determining Sound Localization
Mechanisms in the Big Brown Bat, *Eptesicus fuscus*,
Tim Haresign, Janine M. Wotton, Michael Ferragamo, and
James A. Simmons 280
- 13 Sound Localization from Binaural Cues by the Barn Owl
Auditory System, Andrew Moiseff, Tim Haresign, and
Jianxin Wang 305
- List of Contributors 324
- Index 325
- About the Book and Editors 330
