

Contents

Dedication	v
Preface	vii
1. The Role of Natural Selection in Evolution	1
<i>Mario A. Fares</i>	
2. Identifying Evolution Signatures in Molecules	9
<i>Mario A. Fares</i>	
3. Modeling Evolution of Molecular Sequences	28
<i>Mario A. Fares</i>	
4. Identifying Natural Selection with Molecular Data	48
<i>Mario A. Fares</i>	
5. Inferring Functional Divergence in Protein Sequences	83
<i>Mario A. Fares and Christina Toft</i>	
6. The Influence of Recombination on the Estimation of Selection from Coding Sequence Alignments	112
<i>Miguel Arenas and David Posada</i>	
7. Why Proteins Evolve at Different Rates: The Determinants of Proteins' Rates of Evolution	126
<i>David Alvarez-Ponce</i>	

8. The Network Framework of Molecular Evolution	179
<i>Ludovica Montanucci, Hafid Laayouni and Jaume Bertranpetit</i>	
9. Molecular Coevolution: Methods and Applications	211
<i>Mario A. Fares and Juan Pablo Labrador</i>	
Index	239
Color Plate Section	241
