

TABLE OF CONTENTS

1. Marshes, Bogs, Swamps, Sloughs, Fens, Tules, and Bayous	1
Introduction	1
Wetland Definitions	4
New Wetland Definitions	7
Wetland Classification	12
Functions of Natural Wetlands	16
Summary	22
2. Wetland Regulation	23
Introduction	23
"The Comprehensive Wetlands Conservation and Management Act of 1995"	28
Definitions	29
Wetland Delineation	30
Exempted Activities	31
Wetland Categorization	33
Mitigation	36
Compensatory Mitigation	38
Mitigation Banking	40
3. Three Important Components — Water, Soil, and Vegetation	43
Introduction	43
Hydrology	43
Inflows	46
Outflows	48
Water Balance	50
Soils	52
Vegetation	54
Anaerobic Conditions	58
Growth and Survival Limitations	60
4. Nature's Methods for Creating and Maintaining Wetlands	63
Introduction	63
Large Scale: Geologic	63
Tectonic	63
Volcanos: Land Slides, Lava Flows, and Crater Lakes	65
Glaciation: Valleys and Continental	66
Sea Level Changes	74
Erosion and Sedimentation	76
Subsidence/Emergence: Karst Topography	79
Aeolian Forces: Nebraska Sandhills	79
Arctic Temperatures and Permafrost	80
Small-Scale Factor	81
Maintenance	85

5. Wetlands: Functions and Values	89
Introduction	89
Life Support Functional Values	90
Microscopic Forms	91
Invertebrates	92
Vertebrates: Fish, Amphibians, Reptiles, Birds, and Mammals	92
Wetland Plants	97
Water Purification	106
Purification Processes	112
Purification Values	115
Hydrologic Modification	117
Erosion Protection	119
Open Space and Aesthetics	119
Cultural Resources	120
Recreation and Education	120
Bio-geo-chemical Cycling	121
6. Defining Your Objectives	125
Creation or Restoration?	125
Objectives	128
Wetlands Functions and Objectives	131
Determining Functional Values	134
7. Advice and Assistance	139
The Team Approach	139
Technical Assistance	140
Financial Assistance	148
Summary	150
8. Site Selection and Evaluation	151
Introduction	151
General Considerations	153
Land Use and Availability	154
Topography and Geology	155
Soils	156
Hydrology	156
Climate and Weather	158
Biology	159
Regulations	162
Specific Considerations	163
Data Collection	164
Sources and Examination of Available Information	165

9. Project Planning	171
Design Selection	171
Available Water Supply	172
Site Topography	180
Soils	181
Other Factors	182
Specific Designs	182
Sizing and Configuration	182
Sealing and Lining	189
Access: Overlooks and Boardwalks	191
10. Major Structures	197
Dikes, Dams, and Berms	197
Water Control Structures	199
Stoplog Structures	202
Swiveling Pipe Structures	208
Estimating Capacity	210
Structure Comparisons	211
Emergency Spillways	213
11. Plans and Construction	221
Preparation of Plans	221
Preparation for Construction	224
Construction	228
12. Plant Selection	235
Introduction	235
Hydrology	235
Substrate	247
Species Characteristics	248
Sources of Plant Materials	258
Wild Collections	259
Commercial Sources	260
Summary	262
13. Planting Vegetation	263
Introduction	263
Natural Methods	263
Planting Vegetation	266
Planting Methods	269
Post-Planting Management	275
14. Attracting and Stocking Wildlife	279

15. Constructed Wetlands — Special Considerations	291
Introduction	291
Design	292
Overview	292
Major Types	294
Siting	295
Size and Configuration	295
System Components	299
Flow Management	300
Plant Materials	303
Construction	306
Operation	306
Monitoring	307
General	307
Volumes	307
Water Quality Parameters	308
Biota	308
A Case History	309
Summary and Comments	311
16. Operation and Maintenance	315
Introduction	315
First Year	318
Second Year	320
Subsequent Years	321
Bogs and Fens	323
Forested Wetlands	324
Other Considerations	325
Mosquitos	326
System Perturbations	327
Routine Maintenance	329
Monitoring	330
17. Wetland Restoration and Creation	337
Appendix A. References	343
Appendix B. Common and Scientific Names	355
Appendix C. Sources of Supply	363
Appendix D. Wetland Training	381
Appendix E. Wetland Newsletters and Journals	385
Index	389
