
Contents

<i>Preface</i>	iii
<i>Contributors</i>	ix
1 Monitoring the Proliferative Capacity of Cultured Animal Cells by Cell Cycle Analysis <i>V. Leelavatcharamas, A. Nicholas Emery, and Mohamed Al-Rubeai</i>	1
2 Use of Flow Cytometry for Monitoring Antibody Productivity and Isolating High-Secreting Hybridoma Cells <i>Katherine L. McKinney and Georges Belfort</i>	17
3 Antibody Secretion Assays Using Gel Microdrops and Flow Cytometry <i>James C. Weaver, John F. Dunne, Forest Gray, Kristina G. Lazzari, and James B. Lin</i>	39
4 High-Resolution Cell Cycle Analysis of Cell Cycle-Regulated Gene Expression <i>Manfred Kubbies, Bernhard Goller, and Guenter Giese</i>	63
5 Stability of Monoclonal Antibody Production in Hybridoma Cell Culture <i>José M. Coco Martin and E. Coen Beuvery</i>	85
6 Flow Cytometric Studies of Osmotically Stressed and Sodium Butyrate-Treated Hybridoma Cells <i>Steve Oh, Florence K. F. Chua, and Mohamed Al-Rubeai</i>	101

- 7 Flow Cytometric Analysis of Cells Obtained from Human Bone Marrow Cultures 121
David Brott, Manfred R. Koller, Sue A. Rummel, and Bernhard Palsson
- 8 Measurement of Intracellular pH During the Cultivation of Hybridoma Cells in Batch and Continuous Cultures 147
Jean-Marc Engasser, Annie Marc, Marc Cherlet, Pierre Nabet, and Patricia Franck
- 9 The Relationship Between Intracellular pH and Cell Cycle in Cultured Animal Cells Using SNARF-1 Indicator 163
Jonathan P. Welsh and Mohamed Al-Rubeai
- 10 Assessment of Cell Viability in Mammalian Cell Lines 177
Xavier Ronot, Sylvain Paillason, and Katherine A. Muirhead
- 11 Analysis of Apoptosis by Flow Cytometry 193
Anne E. Milner, Hong Wang, and Christopher D. Gregory
- 12 Monitoring Baculovirus Infection and Protein Expression in Insect Cells 211
Anthanasia K. Kioukia, N. H. Simpson, Jatin D. Shah, A. Nicholas Emery, and Mohamed Al-Rubeai
- 13 Use of Protein Distribution to Analyze Budding Yeast Population Structure and Cell Cycle Progression 225
Danilo Porro and Lilia Alberghina
- 14 Cell Cycle Analysis of Microorganisms 241
Kirsten Skarstad, Rolf Bernander, Sture Wold, Harald B. Steen, and Erik Boye
- 15 Bacterial Characterization by Flow Cytometry 257
Gerhard Nebe-von Caron and R. Andrew Badley

Contents

vii

- 16 Assessment of Viability of Bacteria by Flow Cytometry 291
Clive Edwards
- 17 Advances in the Flow Cytometric Characterization of 311
Plant Cells and Tissues
David W. Galbraith and Georgina M. Lambert
- Index* 327
