

CONTENTS

PREFACE TO THE SECOND EDITION	xi
PREFACE	xv
I DARWINIAN EVOLUTION AND GENETICS	1
Genotype and Phenotype	15
Speciation	24
Fossils and Speciation	26
Genetics and Speciation	34
Summary	41
II MENDELIAN GENETICS	43
Segregation	47
Independent Assortment	51
Chromosomes	53
Codominance	55
Polygenes	56
Gene Modification	57
Sexual Recombination	61
Gametogenesis	63
Crossing Over	66
Mutation	68
Sex Linkage	69
Asexual Reproduction	73
Chromosomal Variation	79
III CHEMICAL GENETICS	85
DNA	88
Chromosome Reproduction	92

	Protein Synthesis	93
	Gene Mutations	97
	Enzyme Production and Feedback	102
	Pleiotropy and Penetrance	109
IV	POPULATION GENETICS AND EVOLUTION	113
	Population Models and Probability	115
	The Hardy-Weinberg Law	122
	Mutation	126
	Selection	128
	Overdominance and Polymorphism	131
	Mutation and Natural Selection	136
	Genetic Drift, Interbreeding, and Inbreeding	138
V	EVOLUTIONARY SYSTEMS	145
	Two Meanings of Adaptation	147
	Biological Systems	150
	Molecular Behavior	159
VI	BEHAVIORAL GENETICS	161
	Genes and Simple Behavior	164
	Human Behavioral Genetics	171
	Genetically Controlled Complex Behavior	179
	Environmental Modification of Behavioral Genes	181
VII	BEHAVIORAL EVOLUTION	187
	Prerequisites of Adaptive Behavior	190
	Behavioral Strings	194
	Learning	196
	Learning versus Innate Behavior	197
	Comparative Capacities for Learning	199

Behavior and Morphology	200
The Evolution of Behavioral Specializations	202
Concentration, Memory, and Abstraction	206
Language	207
Preconditions for Human Behavior	210
Outline of Human Evolution	212
Summary	222
VIII CULTURE AND HUMAN BEHAVIOR	225
Culture	227
Adaptive Rules and Culture	232
Biology and Culture	236
Culture and Environment	238
Social Evolution	239
Antievolutionism	248
Modern Unilinear Evolutionists	250
English Functionalists	253
Leslie White	254
Multilinear Evolution and Cultural Ecology	256
IX CULTURE AND EVOLUTION	265
Analogue Models	267
Separatism and the Superorganic	268
Species Differences	270
Return to the Biological Model	271
Cultural Process Mechanisms	274
X THE ADAPTIVE MODEL	283
Linear Sequences and Scaling	287
Tests and Hypotheses	289
Population Competition	290

Teleological and Nonteleological

Adaptation 290

Adaptation Within Population

Groups 294

Minimax 299

A Self-Regulating System 303

Empirical Demonstration of

Self-Regulation 305

Mechanisms of Continuity and

Variation 307

Learning Fixation 308

Game Playing 309

Population Pressure 310

The Basis of Adaptive Change and

Continuity 315

Population Size As a Measure of

Adaptation 320

Summary and Conclusion 324

BIBLIOGRAPHY 327

INDEX 337
