PART I

The evolutionary context

1 What Darwin found convincing in Galápagos	3
WILLIAM H. DURHAM	
2 Research on evolutionary principles in Galápagos: an overview of the past 50 years	16
CARLOS A. VALLE AND PATRICIA G. PARKER	
3 Evolution of pathogens and parasites on the Galápagos Islands	35
PATRICIA G. PARKER AND NOAH K. WHITEMAN	
4 Turning points in evolution: ethological perspectives on hominization	52
IRENÄUS EIBL-EIBESFELDT	
5 The boat, the bay, and the museum: significance of the 1905–1906 Galápagos expedition of the California Academy of Sciences	87
MATTHEW J. JAMES	
6 Part I summary: the evolutionary context	100
MATTHIAS WOLFF AND MARK GARDENER	

PART II

Biodiversity assessment and monitoring of change 103

- 7 Monitoring the Galápagos ecosystem: challenges, pitfalls and a vision for the future** 105

JAMES P. GIBBS AND BRYAN MILSTEAD

- 8 The neglected majority: biodiversity inventories as an integral part of conservation biology** 119

FRANK BUNGARTZ, FRAUKE ZIEMMECK,

NATHALIA TIRADO, PATRICIA JARAMILLO,

HENRI HERRERA AND GUSTAVO JIMÉNEZ-UZCÁTEGUI

- 9 The power of long-term monitoring to understand mechanisms of ecosystem change: the case of the Galápagos Marine Reserve** 143

STUART BANKS, RODRIGO BUSTAMANTE, DIEGO RUIZ,

NATALIA TIRADO, MARIANA VERA AND FRANZ SMITH

- 10 Wildlife health monitoring and disease management: protecting the biodiversity of Galápagos** 165

PATRICIA G. PARKER AND SHARON L. DEEM

- 11 Part II summary: biodiversity assessment and monitoring of change** 178

MARK GARDENER AND MATTHIAS WOLFF

PART III

A systemic approach: modeling and restoration 181

- 12 Fifty years of eradication as a conservation tool in Galápagos: what are the limits?** 183

RACHEL ATKINSON, MARK GARDENER, GRANT HARPER

AND VICTOR CARRION

- 13 Food web structure of the Galápagos Marine Reserve after a decade of protection: insights from trophic modeling** 199

MATTHIAS WOLFF, CESAR PEÑAHERRERA-PALMA AND

ANNIKA KRUTWA

- 14 Mediated Modeling: a useful tool for a collaborative and integrated assessment of the Galápagos?** 228

MARJAN VAN DEN BELT

15	Part III summary: a systemic approach – modeling and restoration	240
	MARK GARDENER AND MATTHIAS WOLFF	
PART IV		
	Reconciliation of conservation with socio-economic development	243
16	The value of ecosystem services and biodiversity conservation: a challenge for the Galápagos	245
	ROBERT COSTANZA	
17	Nature and the world: a geohistory of Galápagos	256
	CHRISTOPHE GRENIER	
18	Towards a self-sustained Galápagos?	275
	MATTHIAS WOLFF AND MARK GARDENER	
19	Part IV summary: reconciliation of conservation with socio-economic development	286
	MATTHIAS WOLFF AND MARK GARDENER	
	Index	289
