Preface	v
Genomic view of the cell	1
Just so genome stories: what does my neighbor tell me? <i>S. Noria and A. Danchin (China)</i>	3
Genome biology of a model bacterium, <i>Bacillus subtilis</i> <i>K. Kobayashi and N. Ogasawara (Japan)</i>	15
Mitochondrial protein flux <i>T. Endo (Japan)</i>	27
Peroxisome assembly and peroxisome biogenesis disorders <i>Y. Fujiki (Japan)</i>	33
Toward the global analysis of cellular signaling pathways <i>H. Taniguchi, Y. Murata and E. Yamauchi (Japan)</i>	43
Regulation of the phospholipase C- γ 2 pathway in B cells <i>T. Kurosaki (Japan)</i>	51
Generation and phenotypic analysis of conditionally inactivated mutant cells <i>E. Sonoda, T. Fukagawa, A. Kitao and S. Takeda (Japan)</i>	55
E-CELL: towards computer simulation of the whole cell <i>M. Tomita (Japan)</i>	75
Genomic view of development	81
Deciphering the eye morphogenetic pathway <i>W. Gehring and L. Michaut (Switzerland)</i>	83
Mitogen-activated protein kinase pathways in <i>C. elegans</i> <i>N. Hisamoto, R. Sakamoto and K. Matsumoto (Japan)</i>	91
From evolutionary developmental biology to genomics: towards a genome map of the free-living nematode <i>Pristionchus pacificus</i> <i>J. Srinivasan and R.J. Sommer (Germany)</i>	101

Genomic approaches to early development of <i>C. elegans</i> <i>Y. Kohara</i> (Japan)	111
A genome scientific view of ascidian development <i>N. Satoh and Y. Satou</i> (Japan)	117
Genomic view of diversity	125
Diversity of the cadherin-related neuronal receptor family in the nervous system <i>T. Yagi, M. Tada, Y. Tanaka, K. Senzaki, T. Hirayama, S. Hamada and H. Sugino</i> (Japan)	127
On the roles of mutation and selection in genome evolution: a population genetic approach <i>H. Tachida</i> (Japan)	137
Epigenetic regulation in mammalian development and dysfunction: the effects of somatic cloning and genomic imprinting <i>T. Kohda, J. Lee, K. Inoue, N. Ogonuki, N. Wakisaka-Saito, T. Kaneko-Ishino, A. Ogura and F. Ishino</i> (Japan)	151
Imprinting cluster and domain regulation in Kip2/Lit1 subdomain on mouse chromosome 7F4/F5 <i>T. Mukai, H. Yatsuki, K. Joh, K. Higashimoto and H. Soejima</i> (Japan)	161
A preliminary comparison of the mouse and human genomes <i>R.J. Mural, E.W. Myers, H. Smith</i> (USA), <i>G.L. Gabor Miklos</i> (Australia), <i>R. Wides</i> (Israel), <i>A. Halpern, P.W. Li, G. Sutton, J.H. Nadeau, S.L. Salzberg, R. Holt, C.A. Evans, F. Lu, K. Biddick, V. Bonazzi, A. Delcher, X.H. Zheng, M. Yandell, D. Rusch, W. Majoros, J. Hoover, J. Wang, J.C. Venter and M.D. Adams</i> (USA)	169
Chimpanzee genome project for understanding ourselves <i>Y. Sakaki, H. Watanabe, A. Fujiyama, M. Hattori, A. Toyoda and T.D. Taylor</i> (Japan)	183
Genome evolution	189
Life cycle of restriction-modification gene complexes, powers in genome evolution <i>I. Kobayashi</i> (Japan)	191
Origin and evolution of the plant genome; with a focus on mitochondrial and plastid genomes <i>N. Ohta and T. Kuroiwa</i> (Japan)	201

Early evolution of eukaryotes inferred from genome data <i>N. Arisue, T. Hashimoto and M. Hasegawa (Japan)</i>	209
Exploiting genomics in evolutionary developmental biology <i>P.W.H. Holland (UK), R.R. Copley (Germany), E.A. Snell, R.F. Furlong and P.-M. Agapow (UK)</i>	217
Human genome	231
Oligo-capped cDNAs for promoter identification and annotation <i>S. Sugano, Y. Suzuki, R. Yamashita and K. Nakai (Japan)</i>	233
Approaches to identifying genetic variation for complex phenotypes <i>N.J. Cox (USA)</i>	241
Identification of candidate tumor suppressor genes from critical deletions of long arm of chromosome 6 in hematopoietic neoplasm <i>S. Ogawa, A. Hangaishi and H. Hirai (Japan)</i>	251
Understanding cancer through gene expression profiling <i>H. Aburatani (Japan)</i>	261
Author index	271
Keyword index	273
