Preface	xi
Contributors	xiii
Introduction	xxiii

Part 1 Models of the Infraindividual Level

1. Quantum Chemical Modeling in the Molecular Ecology 3
Sergey Ovchinnikov, Felix Tomilin, Polina Artushenko, Vladislav Sukhovol'sky, Tamara Ovchinnikova, Polina Volkova, Yurii Baranchikov, Evgenii Vysotskii
2. Evolution before Life 15
Vera Vasas, Chrisantha Fernando
3. Dealing with Spatial Autocorrelation in Gene Flow Modeling 35
Daniela Stojanova, Marko Debeljak, Michelangelo Ceci, Annalisa Appice, Donato Malerba, Sašo Džeroski
4. Modeling *In Vitro* Cell-Based Assays Experiments: Cell Population Dynamics 51
José-Manuel Zaldívar Comenges, John Wambaugh, Richard Judson
5. "Keystone Species" of Molecular Interaction Networks 73
Federico Vaggi, Attila Csikász-Nagy

Part 6 Models of Ecosystems

18. Cities as Ecosystems: Functional Similarities and the Quest for Sustainability 297
Antonio Bodini, Cristina Bondavalli, Stefano Allesina
19. Three-Dimensional Modeling of Pollutant Dispersion in Lake Garda (North Italy) 319
Tomas Lovato, Giovanni Pecenik
20. DLES: A Component-Based Framework for Ecological Modeling 331
Maria Bezrukova, Vladimir Shanin, Alexey Mikhailov, Natalia Mikhailova, Yulia Khoraskina, Pavel Grabarnik, Alexander Komarov

Part 7 Models of Landscapes

21. Understanding Forest Changes to Support Planning: A Fine-Scale Markov Chain Approach 355
Marco Ciolli, Clara Tattoni, Fabrizio Ferretti
22. Development of a Program Tool for the Determination of the Landscape Visual Exposure Potential 375
Imrich Jakab, Peter Petluš
23. Spatial Algorithms Applied to Landscape Diversity Estimate from Remote Sensing Data 391
Duccio Rocchini, Niko Balkenhol, Luca Delucchi, Anne Ghisla, Heidi C. Hauffe, Attila R. Imre, Ferenc Jordán, Harini Nagendra, David Neale, Carlo Ricotta, Claudio Varotta, Cristiano Vernesi, Martin Wegmann, Thomas Wohlgemuth, Markus Neteler

24. Offsetting Policies for Biodiversity
Conservation: The Need for Compensating
Habitat Relocation 413
Karin Johst, Florian Hartig, Martin Drechsler
25. Combining Habitat Suitability Models and
Fluvial Functionality Data for a Multilayer
Assessment of Riverine Vulnerability 431
*Maria T. Carone, Tiziana Simoniello, Anna Loy,
Maria L. Carranza*

Part 8 Global Models - Models of the Ecosphere

26. Carbon Cycle Modeling and Principle of the
Worst Scenario 447
*Sergey I. Bartsev, Andrey G. Degermendzhi,
Pavel V. Belolipetsky*
27. The Worst Scenario Principle and the
Assessment of the Impact of Quality of
Life for Biosphere Dynamics 459
*Sergey I. Bartsev, Yuliya D. Ivanova,
Anton L. Shchemel*
28. Modeling and Evaluating the Global Energy
Flow in Ecosystems and its Impacts on the
Ecological Footprint 469
Safwat H. Shakir Hanna, Irvin W. Osborne-Lee

Part 9 Models of Interactions Between Hierarchical Levels and Hierarchy Theory

29. The Dynamics Linking Biological Hierarchies, Fish
Stocks and Ecosystems: Implications for Fisheries
Management 501
Francisco Arreguín-Sánchez

30.	A Network Model of the Hierarchical Organization of Supra-Individual Biosystems	517
	<i>Federica Ciocchetta, Davide Prandi, Michele Forlin, Ferenc Jordán</i>	
31.	Hierarchical Energy Dissipation in Populations	533
	<i>Fernando R. Momo, Santiago R. Doyle, José E. Ure</i>	
Part 10	How to Model the Different Levels of the Ecological Hierarchy?	
32.	Conclusive Remarks About Hierarchy Theory and Multilevels Models	547
	<i>Sven Erik Jørgensen, Ferenc Jordán</i>	
	Subject Index	549
