Preface ix

I

MEMBRANE COMPOSITION AND STRUCTURE

1. Introduction to Biological Membranes

1. What Is a Biological Membrane? 3
2. General Membrane Functions 4
3. Eukaryote Cell Structure 6
4. Size of Domains 11
5. Basic Composition of Membranes 13
6. Summary 14
- References 14

2. Membrane History

1. Oil on Water: Interface Studies 17
2. The Lipid Bilayer Membrane 24
3. Summary 31
- References 32

3. Water and the Hydrophobic Effect

1. Water: Strength in Numbers 35
2. Structure of Water 38
3. Properties of Water: No Ordinary Joe 40
4. Surface Tension 41
5. The Hydrophobic Effect 44
6. Summary 47
- References 48

4. Membrane Lipids: Fatty Acids

1. What Are Lipids? 49
2. Why Are There so Many Different Lipids? 50

3. Lipid Classification Systems 51
4. Fatty Acids 53
5. Summary 61
- References 62

5. Membrane Polar Lipids

1. Introduction 63
2. Bonds Connecting Acyl Chains 64
3. Phospholipids 67
4. Sphingolipids 77
5. Sterols 79
6. Membrane Lipid Distribution 82
7. Plant Lipids 82
8. Membrane Lipids Found in Low Abundance 84
9. Summary 85
- References 85

6. Membrane Proteins

1. Introduction 89
2. The Amino Acids 90
3. How Many Membrane Protein Types Are There? 94
4. Type I. Single Trans-Membrane α -Helix: Glycophorin 100
5. Type II. Multiple Trans-Membrane Span by α -Helices: Bacteriorhodopsin 101
6. Type III. Multiple Trans-Membrane Spans by β -Barrels 103
7. Type IV. Lipid-Anchored Proteins 103
8. Summary 108
- References 109

7. Membrane Sugars

1. Membrane Sugars — Introduction 111
2. Glycolipids 115
3. Glycoproteins 116
4. Summary 118
- References 118

8. From Lipid Bilayers to Lipid Rafts

1. Development of Membrane Models 121
2. The Danielli-Davson "Pauca-Molecular" Model 122
3. The Robertson "Unit Membrane" Model 123
4. Benson and Green Lipoprotein Subunit Models 124
5. Singer-Nicolson "Fluid Mosaic" Model 126
6. Simons Lipid Raft Model 129
7. Summary 133
- References 133

9. Basic Membrane Properties of the Fluid Mosaic Model

1. Size and Time Domains 136
2. Membrane Thickness 138
3. Membrane Asymmetry 141
4. Lateral Diffusion 149
5. Lipid Trans-Membrane Diffusion (Flip-Flop) 156
6. Lipid Melting Behavior 161
7. Membrane Fluidity 172
8. Membrane Dynamics: Harden M. McConnell and Dennis Chapman 175
9. Summary 178
- References 178

10. Lipid Membrane Properties

1. Complex Lipid Interactions 182
2. Nonlamellar Phases 188
3. Lipid Phase Diagrams 196
4. Lipid-Protein Interactions 200
5. Lipid Interdigitation 212
6. Summary 216
- References 217

11. Long-Range Membrane Properties

1. Membrane Lipid Packing 221
2. Membrane Protein Distribution 228
3. Imaging of Membrane Domains 229
4. Homeoviscous Adaptation 240
5. Summary 243
- References 244

12. Membrane Isolation Methods

1. Introduction 248
2. Breaking the Cell — Homogenization 249
3. Membrane Fractionation — Centrifugation 256
4. Membrane Fractionation — Noncentrifugation Methods 261
5. Membrane Markers 268
6. Summary 269
- References 270

13. Membrane Reconstitution

1. Membrane Detergents 274
2. Membrane Protein Isolation 279
3. Membrane Lipid Isolation 282
4. Lipid Models Used in Membrane Studies 290
5. Membrane Reconstitution 301
6. Lipid Rafts 304
7. Summary 309
- References 309

II

MEMBRANE BIOLOGICAL FUNCTIONS

14. Membrane Biogenesis: Fatty Acids

1. Introduction 315
2. Fatty Acid Biosynthesis 316
3. Fatty Acid Storage, Release, and Transport 324
4. Summary 328
- References 328

15. Membrane Biogenesis: Phospholipids, Sphingolipids, Plasmalogens, and Cholesterol

1. Phospholipids 331
2. Sphingolipids 337
3. Plasmalogens 340
4. Cholesterol 342
5. Summary 345
- References 346

16. Membrane Biogenesis: Proteins

1. Introduction 349
2. Synthesis of Secretory Proteins 350
3. Synthesis of Single-Span Proteins ($N_{\text{lumen}}/C_{\text{cytosol}}$) 351
4. Synthesis of a Single-Span Protein ($N_{\text{cytosol}}/C_{\text{lumen}}$) 353
5. Synthesis of Multi-Span Proteins 354
6. Synthesis of Glycosylphosphatidylinositol-Linked Proteins 355
7. Posttranslational Modifications 356
8. Summary 365
- References 366

17. Moving Components Through the Cell: Membrane Trafficking

1. Introduction 369
2. Endo-Membrane Flow (Secretion) 370
3. Receptor-Mediated Endocytosis 372
4. The Golgi 374
5. Intracellular Lipid Transport 375
6. Summary 378
- References 379

18. Membrane-Associated Processes

1. Anesthetics 381
2. G Protein-Coupled Reactions 387
3. Membrane Attack Complex 392
4. Nerve Conduction 395
5. Electron Transport/Oxidative Phosphorylation 405
6. Summary 418
- References 419

19. Membrane Transport

1. Introduction 423
2. Simple Passive Diffusion 427
3. Facilitated Diffusion 429
4. Active Transport 434
5. Ionophores 440
6. Gap Junctions 444

7. Other Ways to Cross the Membrane 445

8. Summary 449
- References 449

20. Bioactive Lipids

1. Introduction 453
2. Ceramides 454
3. Diacylglycerol 458
4. Eicosanoids 462
5. Steroid Hormones 467
6. Phosphatidic Acid 472
7. Summary 475
- References 476

21. Lipid-Soluble Vitamins

1. Introduction 479
2. Vitamin A 480
3. Vitamin D 484
4. Vitamin E 488
5. Vitamin K 493
6. Summary 496
- References 497

22. Membrane-Associated Diseases

1. Cystic Fibrosis 500
2. Duchenne Muscular Dystrophy 502
3. Alzheimer's Disease 504
4. Demyelination Diseases 509
5. Aging 513
6. Summary 516
- References 517

23. Membranes and Human Health

1. Liposomes as Drug Delivery Agents 521
2. Affect of Dietary Lipids on Membrane Structure Function 530
3. Summary 534
- References 535

24. Cell Death, Apoptosis

1. Introduction 539
2. Necrosis 539
3. Apoptosis 540

4. Mechanisms of Apoptosis 541
5. Mitochondrial Role in Apoptosis 542
6. Extracellular Inducers of Apoptosis 542
7. Summary 545
- References 546

25. Chronology of Membrane Studies

Index 553
