Series Editor's Preface

xiii

Preface

xv

1. Biosensors and Related Bioanalytical Tools

1

Francesca Bettazzi, Giovanna Marrazza, Maria Minunni, Ilaria Palchetti,
Simona Scarano

1. Definition and Classification	1
2. Biorecognition Elements	4
3. Transducing Techniques	9
4. Practical Tips in Biosensor Assembly	17
5. New Trends in Biosensor Design	19
6. Conclusions	26
References	26

2. Whole-Cell Biosensors and Bioassays

35

Peter-Diedrich Hansen, Eckehardt Unruh

1. Introduction	35
2. Discussion	37
Acknowledgments	49
References	50

3. New Trends in Antibody-Based Electrochemical Biosensors

55

Mamas I. Prodromidis, Anastasios Economou

1. Introduction	55
2. New Trends in Transduction Approaches	56
3. Microfluidics-Based Biosensing Platforms	68
4. Paper- or Paper-like-based Immunodetection Devices	74
5. Wearable Immunosensors	78
6. Self-powered Immunosensors	81
7. Smartphone-Coupled Immunosensing Systems	87
References	93

4. Aptasensors, an Analytical Solution for Mycotoxins Detection	101
Alina Vasilescu, Jean-Louis Marty	
1. Introduction	101
2. Discussions	103
3. Conclusions	139
Acknowledgement	139
References	140
5. Biomimetic Sensors Based on Molecularly Imprinted Interfaces	147
Mihaela Puiu, Nicole Jaffrezic-Renault, Camelia Bala	
1. Polymers as Alternative Recognition Elements to Natural Receptors	147
2. Polymer Systems and Imprinting Principles	149
3. Physical Form and Configurations of Molecularly Imprinted Polymers	162
4. Interfacing Sensors' Transducers With Molecularly Imprinted Polymers	166
5. Micro- and Nanostructured Molecularly Imprinted Polymers for Sensing Devices	167
6. Market Potential of Molecularly Imprinted Polymer Sensors	172
Acknowledgement	172
References	172
6. Electrochemical Nucleic Acid-Based Strategies for miRNAs Determination	179
Susana Campuzano, María Pedrero, José M. Pingarrón	
1. Introduction	179
2. Electrochemical Biosensors for miRNAs Determination Using Direct or Competitive Hybridization Formats	182
3. Electrochemical Biosensors for miRNAs Determination Using Specific Affinity Bioreceptors	184
4. Electrochemical Biosensors for miRNAs Determination Using Amplification Strategies	190
5. Conclusions and Future Prospects	201
Acknowledgments	202
References	202
7. Nanomaterials-Based Platforms for Environmental Monitoring	207
Flavio Pino, Carmen C. Mayorga-Martinez, Arben Merkoçi	
1. Introduction	207
2. Electrochemical Biosensors	208

3. Electrochemical-Based Immunosensors	209
4. Enzyme-Based Electrochemical Systems	217
5. Molecular Imprinted Polymers and Other Host-Guest-Like Systems	226
6. Other Electrochemical Strategies	229
7. Conclusions	231
Acknowledgements	232
References	233
Further Reading	236
8. Smartphone-Based Biosensors for Bioanalytics: A Critical Review	237
Aldo Roda, Maria M. Calabretta, Donato Calabria, Cristiana Caliceti, Luca Cevenini, Antonia Lopreside, Martina Zangheri	
1. Introduction	237
2. Smartphone-Based Colorimetric Biosensors	240
3. Smartphone-Based Surface Plasmon Resonance Devices	248
4. Smartphone-Based Photoluminescence Biosensors	251
5. Chemical-Luminescence-Based Detection	256
6. Smartphone-Based Electrochemical Biosensors	261
7. Bioluminescence-Based Detection	269
8. Smartphone-Based Microscopy	273
9. Commercially Available Smartphone-Based Biosensors	276
References	281
9. Applications of DNA-Electrochemical Biosensors in Cancer Research	287
Ana-Maria Chiorcea-Paquim, Severino Carlos B. Oliveira, Victor C. Diculescu, Ana Maria Oliveira-Brett	
1. Introduction	287
2. DNA-Electrochemical Biosensor Development	289
3. DNA-Electrochemical Biosensor in Evaluation of Cancer Treatment Drugs	302
4. DNA-Electrochemical Biosensor in Detection of Cancer Biomarker Proteins	320
5. DNA-Electrochemical Biosensor in Risk Assessment of Hazardous Compounds	323
6. Conclusions	328
Acknowledgements	329
References	329

10. Biosensors and Bioassays for Environmental Monitoring	337
Cristina Bosch-Orea, Marinella Farré, Damia Barceló	
1. Bioanalytical Tools for Environmental Monitoring	337
2. New Trends in Ecotoxicity Bioassays	338
3. Biosensors	354
4. Conclusions and Outlook	372
Acknowledgements	373
References	373
11. Paper-Based Electrochemical Devices in Biomedical Field: Recent Advances and Perspectives	385
Fabiana Arduini, Stefano Cinti, Viviana Scognamiglio, Danila Moscone	
1. Introduction	385
2. Which Paper?	387
3. Paper Patterning	390
4. Different Configurations of Paper-Based (Bio)sensors	391
5. Applications of Paper-Based (Bio)sensors in Biomedical Fields	396
6. Perspectives and Conclusions	408
References	409
Further Reading	413
<i>Index</i>	415
