

CONTENTS

<i>Contributors to Volume 82</i>	<i>xiii</i>
<i>Series Editor's Preface</i>	<i>xix</i>
<i>Preface</i>	<i>xxi</i>
1. Introduction to the Data Analysis Relevance in the Omic Era	1
Carmen Bedia, Romà Tauler, and Joaquim Jaumot	
1. Introduction to Omics	1
2. Data Analysis in the Omic Workflow	2
3. Data Analysis Aspects Considered in This Volume	6
4. Future Trends	9
Acknowledgements	10
References	10
2. Experimental Approaches in Omic Sciences	13
Carmen Bedia	
1. Introduction	13
2. The Importance of the Biological Samples	15
3. Targeted and Untargeted Analytical Approaches in Omic Studies	16
4. Sample Preparation in Omics Studies	17
5. Analytical Technologies in Omic Sciences	19
6. Concluding Remarks	32
References	32
3. Introduction to Microarrays Technology and Data Analysis	37
Ricardo Gonzalo and Alex Sánchez	
1. Microarray History	38
2. Microarray Technology	39
3. The Microarray Data Analysis Process	44
4. Microarray Data Preprocessing	44
5. Experimental Design for Microarray Experiments	53
6. Statistical Analysis of Microarray Data	55
7. Microarray Bioinformatics	62
8. Discussion and Conclusions	65
Supplementary Materials	66
Acknowledgements	66
References	66
Further Reading	69

4. RNA-Seq Data Analysis, Applications and Challenges	71
Anna Esteve-Codina	
1. Introduction	72
2. Experimental Design	74
3. Quality Control	77
4. Alignment and Quantification	80
5. De Novo Transcriptome Assembly and Annotation	82
6. Normalization	84
7. Removing Latent Variables	86
8. Differential Expression	88
9. Functional Enrichment	90
10. Detection of Alternative Splicing	91
11. Detection of Chimeric Transcripts	93
12. Detection of Single-Nucleotide Variants	94
13. Detection of Allele-Specific Expression	95
14. Small RNA-Seq	97
15. Single-Cell RNA-Seq	99
16. Future Perspectives	100
References	101
Further Reading	106
5. DNA Methylation Assays Using Bisulphite Sequencing and Next-Generation Sequencing	107
Angelika Merkel and Simon C. Heath	
1. Theoretical Overview of Bisulphite Sequencing and NGS	108
2. Practical Aspects of Analysing BS-Seq Experiments	118
3. Future Perspectives	129
References	131
6. Data Quality Assessment in Untargeted LC-MS Metabolomics	137
Guillermo Quintás, Ángel Sánchez-Illana, Jose David Piñeiro-Ramos, and Julia Kuligowski	
1. Quality Control (QC) and Quality Assurance (QA) in Metabolomics	138
2. QC Checkpoints	143
3. Data Quality Estimators	149
4. Improving Data Quality	157
5. Summary	161
References	162

7. Data Normalization and Scaling: Consequences for the Analysis in Omics Sciences	165
Jan Walach, Peter Filzmoser, and Karel Hron	
1. Introduction	165
2. Normalizations and Transformations	167
3. Scaling	176
4. Practical Aspects of the Methods	179
5. Discussion and Conclusions	191
Acknowledgments	192
References	192
8. Metabolomics Data Preprocessing: From Raw Data to Features for Statistical Analysis	197
Ibrahim Karaman, Rui Climaco Pinto, and Gonalo Graa	
1. Introduction	197
2. File Types, Data Formats and Conversion	198
3. NMR Preprocessing	198
4. Mass Spectrometry Data Preprocessing	204
5. Concluding Remarks	221
Acknowledgements	222
References	222
9. Exploratory Analysis of Metabolomic Data	227
Ivana Stanimirova and Michał Daszykowski	
1. Introduction	227
2. Projection Methods	232
3. Clustering Methods	243
4. Concluding Remarks	260
References	261
10. Chemometric Methods for Classification and Feature Selection	265
Marina Cocchi, Alessandra Biancolillo, and Federico Marini	
1. Multivariate Classification	265
2. Data Fusion	281
3. Variable/Feature Selection	283
4. Validation	293
References	295

11. ASCA: The Implementation of Design of Experiments Into Multivariate Modelling in Chemometrics	301
Jeroen Jansen and Jasper Engel	
1. Introduction	302
2. The Need for ASCA	303
3. ASCA: Hyphenating Data Analysis Methods	307
4. Decomposition of Variation According to Design of Experiments	308
5. Mathematical Background of ANOVA Simultaneous Component Analysis	312
6. Related Statistical Methods	317
7. Application of ASCA on a Chemical Ecology Dataset	324
8. Conclusions and Discussion	332
9. Software Availability	333
References	333
12. Compression and Resolution Tools for the Analysis of Untargeted Metabolomic Data	337
Eva Gorrochategui, Joaquim Jaumot, and Romà Tauler	
1. Introduction	337
2. Tools for the Analysis of Metabolomic and Lipidomic Data	338
3. Conversion and Import of LC-MS Data	339
4. LC-MS Metabolomic/Lipidomic Data Structures	341
5. LC-MS Preprocessing: Data Compression	342
6. Chemometric Tools for Omic Studies (Chemomics)	350
7. ROIMCR Procedure: Chemometric Profiling by MCR-ALS of ROI Data	352
8. Validation of ROIMCR Procedure for Quantitative Process	360
9. Feature Selection, Biomarker Discovery and Biochemical Interpretation	363
10. Conclusions	364
References	365
13. Analysis and Interpretation of Mass Spectrometry Imaging Datasets	369
Markus de Raad, Trent R. Northen, and Benjamin P. Bowen	
1. Introduction and Background	369
2. Commonly Used MSI Software	371
3. Data Types	371
4. Data Analysis	374
5. Future Directions	382
Acknowledgements	383
References	383

14. An Overview of Metabolomics Data Analysis: Current Tools and Future Perspectives	387
Santosh Lamichhane, Partho Sen, Alex M. Dickens, Tuulia Hyötyläinen, and Matej Orešič	
1. Metabolomics: An Overview	387
2. Metabolomics Data Analysis	388
3. Metabolite Set Analysis and Pathway Overrepresentations	401
4. Mathematical Modelling of Metabolism	403
5. Conclusions	406
Acknowledgement	407
References	407
15. Metabolite Annotation and Identification	415
Joanna Godzien, Alberto Gil de la Fuente, Abraham Otero, and Coral Barbas	
1. Introduction	415
2. Ion Annotation	419
3. Spectral Information—Tandem Mass Spectrometry—MS/MS	426
4. Chromatographic and Electrophoretic Information	434
5. Nonanalytical Information	438
6. Summary	440
References	441
16. Multiomic Data Integration and Analysis via Model-Driven Approaches	447
Igor Marín de Mas	
1. Introduction	447
2. Model-Driven Methods to Study Metabolism	451
3. Transcriptomic and Proteomic Data Integration	457
4. Metabolomic Data Integration	464
5. Multiomic Data Integration Approaches	468
6. Future Challenges	470
References	471
17. Integration of Metabolomic Data From Multiple Analytical Platforms: Towards Extensive Coverage of the Metabolome	477
Julien Boccard and Serge Rudaz	
1. Introduction	477
2. Analytics	478

3. Chemometrics	484
4. Bioinformatics	495
5. Conclusion	497
References	498
18. Multiomics Data Integration in Time Series Experiments	505
Sonia Tarazona, Leandro Balzano-Nogueira, and Ana Conesa	
1. Introduction	505
2. Unsupervised Methods	509
3. Supervised Methods	514
4. Multiomics Visualization	522
5. Final Remarks	527
References	528
19. Applications of Metabolomics Analysis in Environmental Research	533
Carmen Bedia, Paulo Cardoso, Núria Dalmau, Elba Garreta-Lara, Cristian Gómez-Canela, Eva Gorrochategui, Meritxell Navarro-Reig, Elena Ortiz-Villanueva, Francesc Puig-Castellví, and Romà Tauler	
1. Introduction	533
2. Metabolomics in Environmental Microbiology	536
3. Metabolomics of Microbial VOCs	543
4. Metabolomics in Plant Environmental Research	545
5. Environmental Metabolomics in Aquatic Organisms	555
6. Metabolomics in Environmental Human Health	558
7. Conclusions and Future Perspectives	568
References	569
20. Functional Data Analysis: Omics for Environmental Risk Assessment	583
Benjamin Piña, Demetrio Raldúa, Carlos Barata, José Portugal, Laia Navarro-Martín, Rubén Martínez, Inmaculada Fuertes, and Marta Casado	
1. Introduction—The Omic Perspective	583
2. Omics and Data Analysis	589
3. Functional Analysis	593
4. Data Fusion	596
5. The AOP Concept	598

6. Omics for Deciphering Mechanisms of Action of Toxicants Inducing Complex Phenotypes	600
7. Concluding Remarks: The Need for a Synthetic Approach	606
Acknowledgements	606
References	607
21. Data Analysis in Transcriptomics and Metabolomics Clinical Applications	613
Hector Gallart-Ayala, José Fernández-Navarro, and Antonio Checa	
1. Introduction	613
2. Transcriptomics Applications in the Clinical and Biochemical Field	616
3. Metabolomics Applications in the Clinical and Biochemical Field	623
4. Transcriptomics and Metabolomics Data Integration	630
5. Conclusions and Future Perspectives	634
References	636
22. Foodomics Applications	643
Carlos León, Alejandro Cifuentes, and Alberto Valdés	
1. Introduction to Foodomics: Definition and Principles	643
2. Data Analysis in Food Strategies	645
3. Integration of Omics Data in Foodomics Strategies	668
4. Conclusions and Future Outlooks	672
References	673
Index	687
