CHAPTER 1 Technologies for extraction and production of bioactive compounds 1

Balraj Singh Gill, Navgeet and Feng Qiu

1. Introduction	2
2. History of bioactive compounds.....	2
3. Synthesis of bioactive compounds.....	3
4. Source of bioactive compounds	4
4.1 Plant tissues.....	4
4.2 Marine system.....	4
4.3 Microorganisms.....	5
4.4 Algae and microalgae.....	5
4.5 Metabolic engineering (ME).....	5
5. Methods for extracting bioactive compounds.....	6
5.1 Solvent extraction.....	6
5.2 Nonconventional methods	6
5.3 Green extraction techniques.....	7
5.4 Supercritical fluid extraction (SFE).....	8
5.5 Microwave-assisted extraction (MAE).....	9
5.6 Ultrasound-assisted extraction (UAE).....	23
5.7 Pressurized liquid extraction (PLE).....	23
5.8 Pulsed-electric field extraction (PEF)	24
6. Bioactive compounds as a source of functional foods	24
7. Conclusion.....	24
Acknowledgments.....	25
References.....	25

CHAPTER 2 Recovery and utilization of bioactives from food processing waste 37

Santosh Kumar, Rekha Kushwaha and Madan L. Verma

1. Introduction	37
2. Recovery of bioactives from various plant-based food waste	41
2.1 Proteins.....	42
2.2 Polysaccharides.....	48

2.3 Phenolic compounds.....	53
3. Utilization of bioactive compound from food wastes.....	56
4. Conclusion and future aspects	57
Acknowledgments.....	57
References.....	57
CHAPTER 3 Bioflavonoids: synthesis, functions and biotechnological applications.....	69
<i>Madan L. Verma, Sneh Sharma, Raj Saini, Varsha Rani and Rekha Kushwaha</i>	
1. Introduction	70
2. Chemistry and sources of flavonoids.....	71
2.1 Chemistry of flavonoids.....	71
2.2 Classification and sources of flavonoids.....	72
3. Methods of flavonoid extraction.....	83
3.1 Chemical methods of extraction	83
3.2 Physical methods of extraction.....	85
4. Health benefits of flavonoids.....	88
4.1 Free radical scavenging.....	88
4.2 Anti tumor effects.....	89
4.3 Anti artherosclerotic effects	90
4.4 Anti diabetic effects.....	90
5. Conclusion and future directions.....	93
References.....	93
CHAPTER 4 Bioactive peptides: synthesis, functions and biotechnological applications.....	107
<i>Vivek Chauhan and Shamsher Singh Kanwar</i>	
1. Introduction.....	108
2. Sources.....	109
3. BAPs from animal sources.....	109
4. BAPs from vegetal sources	110
5. Peptides from food sources	111
6. Milk.....	112
7. Eggs.....	112
8. Meat	113
9. Exogenous peptides	113
10. Production of BAPs.....	114
10.1 Enzymatic synthesis	115
10.2 Microbial fermentation.....	115
10.3 Chemical synthesis.....	116
10.4 Synthesis by recombinant DNA technology	117

11. Purification and recovery approaches.....	117
12. Broader functions and biotechnological applications of peptides.....	119
13. Antimicrobial BAPs.....	119
14. Antioxidative peptides.....	120
15. Cytomodulatory and immunomodulatory/ anti-inflammatory peptides.....	121
16. Antihypertensive peptides.....	123
17. Anticancerous peptides.....	124
18. Opioid peptides.....	125
19. Biotechnology applications.....	126
20. Conclusion and future directions.....	127
Acknowledgments.....	128
References.....	128
CHAPTER 5 Biotechnological production of phytosteviosides and their potential applications.....	139
<i>Meenu Thakur, Anuj K. Chandel, Santosh Kumar and Madan L. Verma</i>	
1. Introduction.....	140
2. Structure and biochemical properties of steviosides.....	140
3. Estimation of steviosides.....	142
4. Extraction of steviosides.....	143
5. Conventional approaches for phytostevioside production.....	144
6. Biotechnological production of stevioside.....	145
7. Using tissue culture technology.....	145
8. Establishment of callus and suspension cultures.....	146
9. Stevioside production using bioreactors.....	147
10. Production of steviosides with recombinant DNA technology.....	148
11. Production of steviosides using metabolic engineering....	148
12. Applications of phytosteviosides.....	150
13. Application of stevioside as substitute for table sugar....	150
14. Application of steviosides in food industry and beverages.....	152
15. Application of steviosides in dairy industry.....	154
16. Applications of steviosides as therapeutics.....	155
17. Safety aspects and toxicity of steviosides.....	156
18. Current status and future prospects of steviosides.....	157
19. Future prospects.....	158
20. Conclusion.....	158
References.....	158

CHAPTER 6	Biotechnological application of health promising bioactive molecules	165
	<i>Pankaj Kumar, Ishani Shaunak and Madan L. Verma</i>	
1.	Introduction	165
2.	Biotechnological intervention for improving bioactive molecules in vegetables	168
3.	Biotechnological implication of medicinal plants research	175
4.	<i>In vitro</i> plant regeneration and micropropagation	175
5.	Bioinformatics resources and "Omics" based Himalayan medicinal plants research	178
6.	Scope and limitation of health promising bioactive compounds	181
7.	Conclusion and future directions	183
	Acknowledgments	184
	References	184
CHAPTER 7	Biotechnological production of high-valued algal astaxanthin and lutein under different growth conditions	191
	<i>Santosh Kumar, Balraj Singh Gill, Aruna Verma, Madan L. Verma and Rekha Kushwaha</i>	
1.	Introduction	192
2.	Astaxanthin	193
2.1	Astaxanthin (sources and importance)	193
2.2	Structure	194
3.	Lutein	194
3.1	Lutein sources and importance	194
3.2	Chemical structure	196
4.	Biotechnological production of algal high-valued compounds	196
4.1	Astaxanthin	196
4.2	Lutein	205
5.	Conclusion and future directions	210
	Acknowledgments	210
	References	210
CHAPTER 8	Biotechnological exploitation of cyanobacteria and microalgae for bioactive compounds	221
	<i>Shailendra Kumar Singh, Rupali Kaur, Ajay Bansal, Suman Kapur and Shanthi Sundaram</i>	
1.	Introduction	222
2.	Algae as a source of bioactive compounds	223

3.	Algae: cellular structure	224
3.1	Prokaryotic microalgae: cyanobacteria.....	224
3.2	Eukaryotic microalgae	226
4.	Microalgal bioactive compounds.....	227
4.1	Antioxidant compounds	228
4.2	Anti-inflammatory compounds	230
4.3	Antimicrobial compounds	231
4.4	Antitumoral compounds.....	239
4.5	Additional bioactive compounds.....	240
5.	Microalgal cell factories for bioactive compounds	243
5.1	Microalgae cultivation	243
5.2	Extraction of algae-derived bioactive compounds	244
6.	Concluding remarks and future directions.....	245
	References.....	245
CHAPTER 9	Biotechnological production of sweeteners.....	261
	<i>Andrés Felipe Hernández-Pérez, Fanny Machado Jofre,</i>	
	<i>Sarah de Souza Queiroz, Priscila Vaz de Arruda,</i>	
	<i>Anuj K. Chandel and Maria das Graças de Almeida Felipe</i>	
1.	Introduction	262
2.	Classification of sweeteners	263
2.1	Artificial sweeteners.....	263
2.2	Modified sugars.....	264
2.3	Natural caloric sweeteners.....	264
2.4	Natural zero calorie sweeteners	264
2.5	Sugars.....	266
2.6	Sugar alcohols.....	266
3.	Commercial outlook and demand of sweeteners	266
4.	Health effects of sweeteners and regulations for consumptions	269
4.1	Xylitol	269
4.2	Erythritol.....	270
4.3	Sorbitol.....	270
4.4	Mannitol	270
4.5	Sucralose.....	271
4.6	Aspartame	271
5.	Biotechnological production of sweeteners	271
5.1	Xylitol	271
5.2	Erythritol.....	274
5.3	Arabitol	277

5.4 Sorbitol.....	279
5.5 Mannitol.....	281
6. Conclusion and future directions.....	282
Acknowledgments.....	283
References.....	283
CHAPTER 10 Microbial production of omega-3 polyunsaturated fatty acids.....	293
<i>Madan L. Verma, Kaushal Kishor, Deepka Sharma, Sanjeev Kumar and Krishan D. Sharma</i>	
1. Introduction.....	294
2. Biosynthesis mechanism of omega-3 fatty acids.....	295
3. Sources of omega-3-fatty acids.....	295
3.1 Microflora.....	297
4. Bioprocessing of omega-3 fatty acids production.....	300
4.1 Optimization of physicochemical condition on production of DHA.....	300
5. Extraction and quantification of microalgal omega-3 fatty acids.....	305
6. Extraction of omega-3 fatty acids from fungi.....	313
7. Conclusion and future directions.....	315
References.....	316
CHAPTER 11 Production of fungal and bacterial pigments and their applications.....	327
<i>Salvador Sánchez-Muñoz, Gilda Mariano-Silva, Marcela O. Leite, Fabiana B. Mura, Madan L. Verma, Silvio S. da Silva and Anuj K. Chandel</i>	
1. Introduction.....	327
1.1 Biopigments types, classification and properties.....	329
2. Microorganisms: their role as assets in biopigments production.....	333
2.1 Physiological aspects of microbial biopigments production.....	333
2.2 Microorganisms: an asset in biopigment production...	334
2.3 Consolidated processes for microbial processes production.....	336
2.4 Prospecting microorganisms for biopigments and innovative applications of these metabolites.....	337
2.5 Strain improvement methods for improved biopigments production.....	338

3. Fermentation: methods and new formulations for biopigment production	341
3.1 Potential biomasses as a substrate for biopigment production	341
3.2 Effect of carbon and nitrogen sources for the production of biopigments	342
3.3 Reactor configuration and fermentation modes	344
4. Biopigments recovery methods	345
5. Potential applications	349
6. Conclusion and future directions	351
Acknowledgments	352
References	352
CHAPTER 12 Biotechnological production and applications of ribonucleases	363
<i>Rakesh Kumar and Shamsher Singh Kanwar</i>	
1. Introduction	364
2. Major sources of RNases	365
2.1 Bacterial and archaeal ribonucleases	366
2.2 Fungal ribonucleases	366
2.3 Plant ribonucleases	367
2.4 Animal ribonucleases	368
3. Potential applications of ribonucleases	368
4. Ribonuclease A (RNase A)	371
5. Ribonuclease P	371
6. Ribonuclease H	372
7. Role of ribonucleases in cancerous diseases	373
8. Bovine seminal ribonuclease (BR-RNase)	375
9. Onconase	376
10. RNase T1	377
11. Binase	378
12. Barnase	378
13. RNase Sa	379
14. α -Sarcin	380
15. Actibind and RNase T2	380
16. Antiviral activity of ribonucleases	380
17. Conclusion and future directions	381
Acknowledgments	382
References	382

CHAPTER 13	Green nanotechnology for bioactive compounds delivery	391
	<i>Priya Sharma, Praveen Guleria and Vineet Kumar</i>	
	1. Introduction	391
	2. Green chemistry and its principles	392
	3. Medicinal importance of bioactive molecules	395
	4. Biological synthesis of nanoparticles	396
	5. Nanomaterials based bioactive compound delivery	396
	5.1 Nanomaterials for delivery of anti-oxidant bioactive molecules	397
	5.2 Nanomaterials for delivery of anti-cancer bioactive molecules	398
	5.3 Nanomaterials for delivery of anti-malarial bioactive molecules	399
	5.4 Nanomaterials for delivery of anti-bacterial bioactive molecules	400
	5.5 Nanomaterials for delivery of wound healing bioactive molecules	400
	6. Conclusion and future directions	401
	Acknowledgments	401
	References	402
CHAPTER 14	Recent trends in the development of nano-bioactive compounds and delivery systems	409
	<i>Avinash P. Ingle, Sudhir Shende, Indarchand Gupta and Mahendra Rai</i>	
	1. Introduction	409
	2. Bioaccessibility and bioavailability of bioactive compounds	412
	3. Nano-bioactive compounds	413
	4. Nano-based systems for the delivery of nanobioactive compounds	415
	4.1 Polymeric nanoparticles	415
	4.2 Solid lipid nanoparticles	418
	4.3 Liposomes	420
	4.4 Nanostructured lipid carriers (NLCs)	421
	4.5 Nanoniosomes	422
	4.6 Nanoemulsions	422
	5. Conclusion and future directions	423
	References	424

CHAPTER 15	Nanotechnology for enhanced bioactivity of bioactive compounds	433
	<i>Moumita Majumdar, Saurabh Shivalkar, Ayantika Pal, Madan L. Verma, Amaresh Kumar Sahoo and Dijendra Nath Roy</i>	
	1. Introduction	434
	2. Role of “nano” to enhance the activity of bioactive compounds	435
	2.1 Enzyme catalysis	435
	2.2 Detection of pathogen and biomarkers	436
	2.3 Hormonal balance	438
	2.4 Application in healing from wounds	441
	2.5 Application in immune responses	442
	3. Increase the biological activity of bioactive molecules by using nanotechnology	444
	3.1 Design of nanocarriers for delivery of bioactive molecules	445
	3.2 Design of nanocarriers by using bioactive molecules	449
	3.3 Tissue engineering	452
	4. Scope and limitation of bioactive compounds	454
	5. Conclusion and future directions	455
	References	456
	Index	467
