

CONTENTS

Contributors	vii
Preface	ix
1 Modeling of Relations between Ionic Fluxes and Membrane Potential in Artificial Membranes	1
<i>Agata Michalska and Krzysztof Maksymiuk</i>	
2 Transmembrane Ion Fluxes for Lowering Detection Limit of Ion-Selective Electrodes	23
<i>Tomasz Sokalski</i>	
3 Ion Transport and (Selected) Ion Channels in Biological Membranes in Health and Pathology	61
<i>Krzysztof Dołowy</i>	
4 Electrical Coupling through Gap Junctions between Electrically Excitable Cells	83
<i>Yaara Lefler and Marylka Yoe Uusisaari</i>	
5 Enzyme Film Electrochemistry	105
<i>Julea N. Butt, Andrew J. Gates, Sophie J. Marritt and David J. Richardson</i>	
6 Plant Photosystem II as an Example of a Natural Photovoltaic Device	121
<i>Wiesław I. Gruszecki</i>	

7	Electrochemical Activation of Cytochrome P450	133
	<i>Andrew K. Udit, Michael G. Hill and Harry B. Gray</i>	
8	Molecular Properties and Reaction Mechanism of Multicopper Oxidases Related to Their Use in Biofuel Cells	169
	<i>Edward I. Solomon, Christian H. Kjaergaard and David E. Heppner</i>	
9	Electrochemical Monitoring of the Well-Being of Cells	213
	<i>Kalle Levon, Qi Zhang, Yanyan Wang, Aabhas Martur and Ramya Kolli</i>	
10	Electrochemical Systems Controlled by Enzyme-Based Logic Networks: Toward Biochemically Controlled Bioelectronics	231
	<i>Jan Halámek and Evgeny Katz</i>	
	Index	253
