

CONTENTS

Contributors	vii
Preface	xi
1 Understanding Gene Duplication Through Biochemistry and Population Genetics	1
<i>David A. Liberles, Grigory Kolesov, and Katharina Dittmar</i>	
2 Functional Divergence of Duplicated Genes	23
<i>Takashi Makino, David G. Knowles, and Aoife McLysaght</i>	
3 Duplicate Retention After Small- and Large-Scale Duplications	31
<i>Steven Maere and Yves Van de Peer</i>	
4 Gene Dosage and Duplication	57
<i>Fyodor A. Kondrashov</i>	
5 Myths and Realities of Gene Duplication	77
<i>Austin L. Hughes and Robert Friedman</i>	
6 Evolution After and Before Gene Duplication?	105
<i>Tobias Sikosek and Erich Bornberg-Bauer</i>	
7 Protein Products of Tandem Gene Duplication: A Structural View	133
<i>William R. Taylor and Michael I. Sadowski</i>	
8 Statistical Methods for Detecting Functional Divergence of Gene Families	163
<i>Xun Gu</i>	
9 Mapping Gene Gains and Losses Among Metazoan Full Genomes Using an Integrated Phylogenetic Framework	173
<i>Athanasia C. Tzika, Raphaël Helaers, and Michel C. Milinkovitch</i>	
10 Reconciling Phylogenetic Trees	185
<i>Oliver Eulenstein, Snehalata Huzurbazar, and David A. Liberles</i>	

11	On the Energy and Material Cost of Gene Duplication	207
	<i>Andreas Wagner</i>	
12	Fate of a Duplicate in a Network Context	215
	<i>Orkun S. Soyer</i>	
13	Evolutionary and Functional Aspects of Genetic Redundancy	229
	<i>Ran Kafri and Tzachi Pilpel</i>	
14	Phylogenomic Approach to the Evolutionary Dynamics of Gene Duplication in Birds	253
	<i>Chris L. Organ, Matthew D. Rasmussen, Maude W. Baldwin, Manolis Kellis, and Scott V. Edwards</i>	
15	Gene and Genome Duplications in Plants	269
	<i>Pamela S. Soltis, J. Gordon Burleigh, Andre S. Chanderbali, Mi-Jeong Yoo, and Douglas E. Soltis</i>	
16	Whole Genome Duplications and the Radiation of Vertebrates	299
	<i>Shigehiro Kuraku and Axel Meyer</i>	
	Index	313
