

Contents

Contributors Preface

The Siren's Song: This Death That Makes Life Live
Gerry Melino, Richard A Knight and Jean Claude Ameisen

The Origin and Evolution of Programmed Cell Death
Jean Claude Ameisen

Cell Death in *C. elegans*
Ataman Sandoel and Michael O Hengartner

Caspases and Cell Death
Lorraine D Hernandez, Caroline Houde, Maarten Hoek, Brent Butts, Donald W Nicholson and Huseyin Mehmet

The Apoptosome: The Executioner of Mitochondria-mediated Apoptosis
Elisabetta Ferraro and Francesco Cecconi

Caspases, Substrates and Sequential Activation
John G Walsh and Seamus J Martin

Dismantling the Apoptotic Cell
Paula Deming and Sally Kornbluth

The BCL-2 Family Proteins – Key Regulators and Effectors of Apoptosis
David L Vaux

BH3-only Proteins
Lina Hoppo, Andreas Strasser and Clare L Scott

Mitochondrial Outer Membrane Permeabilization
Melissa J Parsons and Douglas R Green

Mitochondria Fusion and Fission
Giovanni Benard, Guihong Peng and Mariusz Karbowski

Death Receptors
Peter H Krammer and Inna N Lavrik

vii Death Receptors at the Molecular Level:
xi Therapeutic Implications
Marion MacFarlane 117

1 Death Receptor-induced Necroptosis 127
Wim Declercq, Franky Van Herreweghe, Tom Vanden Berghe and Peter Vandenabeele

13 Inhibitor of Apoptosis (IAP) and BIR-containing Proteins 138
David L Vaux

21 Structures, Domains and Functions in Cell Death (DD, DED, CARD, PYD) 147
Hao Wu and Yu-Chih Lo

30 Structure and Function of IAP and Bcl-2 Proteins 156
Mark G Hinds, Peter D Mace and Catherine L Day

Engulfment of Apoptotic Cells and its Physiological Roles 165
37 *Rikinari Hanayama, Masanori Miyanishi, Hiroshi Yamaguchi, Jun Suzuki and Shigekazu Nagata*

50 Autophagy 175
Maria Isabel Colombo and Hans-Uwe Simon

60 Autophagy in Nonmammalian Systems 189
Jahda H Hill and Eric H Baehrecke

Apoptosis: Regulatory Genes and Disease 197
69 *James E Vince and John Silke*

Caspases in Inflammation and Immunity 212
75 *Philippe M LeBlanc and Maya Saleh*

Immunity, Granzymes and Cell Killing 223
90 *Nigel J Waterhouse, Olivia Susanto, Karin A Sedelies and Joseph A Trapani*

97 P53 and Cell Death 230
Kamil Wolyniec, Sue Haupt and Ygal Haupt

110 Cornification of the Skin: A Non-apoptotic Cell Death Mechanism 240
Eleonora Candi, Richard A Knight and Gerry Melino

Apoptosis: Inherited Disorders <i>Helen C Su and Michael J Lenardo</i>	253	Microbial Inhibitors of Apoptosis <i>Georg Häcker</i>	272
From Reactive Oxygen and Nitrogen Species to Therapy <i>Scott R McKercher, Tomohiro Nakamura and Stuart A Lipton</i>	262	Drug Discovery in Apoptosis <i>Tom O'Brien and Vishva M Dixit</i>	282
		Subject Index	293
