1 Introduction to Fungal Physiology

1

Graeme M. Walker and Nia A. White

1.1 Introduction

1

1.2 Morphology of Yeasts and Fungi

2

1.3 Ultrastructure and Function of Fungal Cells

4

1.4 Fungal Nutrition and Cellular Biosyntheses

11

1.5 Fungal Metabolism

21

1.6 Fungal Growth and Reproduction

26

1.7 Conclusions

33

Revision Questions

33

References

34

Further Reading

34

2 Fungal Genetics

37

Malcolm Whiteway and Catherine Bachewich

2.1 Introduction

37

2.2 Fungal Life Cycles

39

2.3 Sexual Analysis: Regulation of Mating

46

2.4 Unique Characteristics of Filamentous Fungi that are Advantageous for Genetic Analysis

51

2.5 Genetics as a Tool

52

2.6 Conclusion

62

Acknowledgement

63
