

Contents

PART 1

Biology: The Study of Life 1

1 / Biology: The Study of Life 2

► **STEPS TO DISCOVERY:**

Exploring Life—The First Step 3

Distinguishing the Living from the Inanimate 4

Levels of Biological Organization 8

What's in a Name 10

Evolution and Adaptation: Biology's Central
"Unifier" 12

Biology and Modern Ethics 15

Biology and the Process of Science 15

Synopsis 20

PART 2

Chemical and Cellular Foundations of Life 23

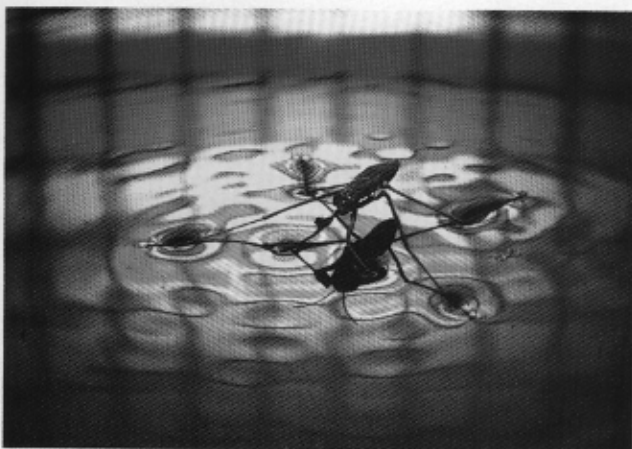

2 / The Chemical Basis of Life 24

► **STEPS TO DISCOVERY:**

Determining the Structure of Proteins 25

The Nature of Matter 26

The Structure of the Atom 27

Chemical Bonds 30

The Life-Supporting Properties of Water 32

Acids, Bases, and Buffers 34

The Importance of Carbons in Biological
Molecules 35

Molecular Giants 37

Four Biochemical Families 37

The Human Perspective

Obesity and the Hungry Fat Cell 43

Evolution and Adaptation: Tying it Together 48
Synopsis 49

3 / Cell Structure and Function 52

► **STEPS TO DISCOVERY:**

The Nature of the Plasma Membrane 53

The Cell Theory 54

Two Fundamentally Different Classes of Cells 55

The Plasma Membrane: Specialized for Interaction
with the Environment 56

The Eukaryotic Cell: Organelle Structure and
Function 56

Movement of Materials Across Membranes 65

The Human Perspective

LDL Cholesterol, Endocytosis, and Heart Disease 67

An Overview of Cell Structure and Function 68

Evolution and Adaptation: Tying it Together 69

Synopsis 70

4 / The Metabolism of Life 72

► **STEPS TO DISCOVERY:**

The Chemical Nature of Enzymes 73

Acquiring and Using Energy 74

Enzymes 76

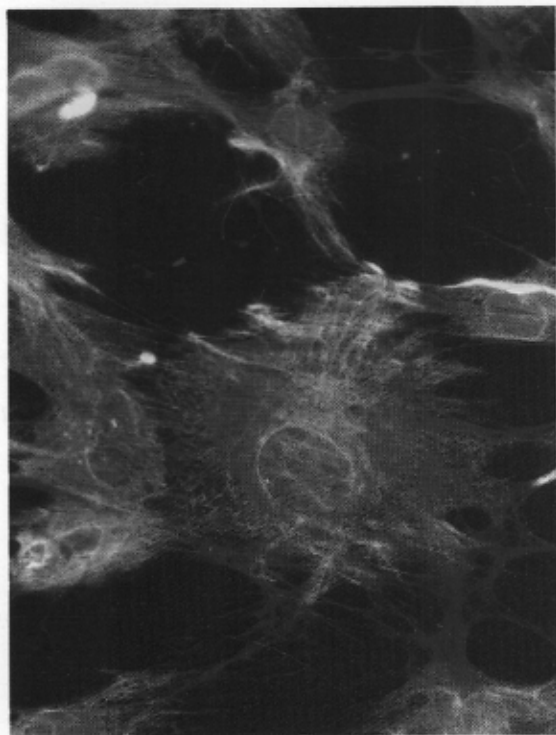

Metabolic Pathways 78

The Human Perspective

Saving Lives by Inhibiting Enzymes 79

Evolution and Adaptation: Tying it Together 82

Synopsis 82

5 / Energy and Life: Photosynthesis 84

► STEPS TO DISCOVERY:

Turning Inorganic Molecules into Complex Sugars 85

An Overview of Photosynthesis 87

Light-Dependent Reactions 87

Light-Independent Reactions 93

Chemosynthesis 94

The Human Perspective

Biochemical Flexibility: Adjusting to Environmental Conditions 95

Evolution and Adaptation: Tying it Together 95

Synopsis 96

6 / Energy and Life: Respiration and Fermentation 98

► STEPS TO DISCOVERY:

The Material Responsible for ATP Synthesis 99

Fermentation and Aerobic Respiration:

A Preview 100

Glycolysis 101

Fermentation 101

Aerobic Respiration 103

Balancing the Metabolic Books 107

The Human Perspective

The Role of Anaerobic and Aerobic Metabolism in Exercise 108

Coupling Glucose Oxidation to Other Pathways 109

Evolution and Adaptation: Tying it Together 110

Synopsis 111

7 / Perpetuating Life: Cell Division 112

► STEPS TO DISCOVERY:

Counting Human Chromosomes 113

Cell Division in Eukaryotes 114

The Cell Cycle 114

Mitosis 114

Chromosome Numbers: Haploidy and Diploidy 119

Meiosis 120

The Human Perspective

Cancer: The Cell Cycle Out of Control 122

Evolution and Adaptation: Tying it Together 125

Synopsis 126

PART 3

The Genetic Basis of Life 129

8 / Fundamentals of Inheritance 130

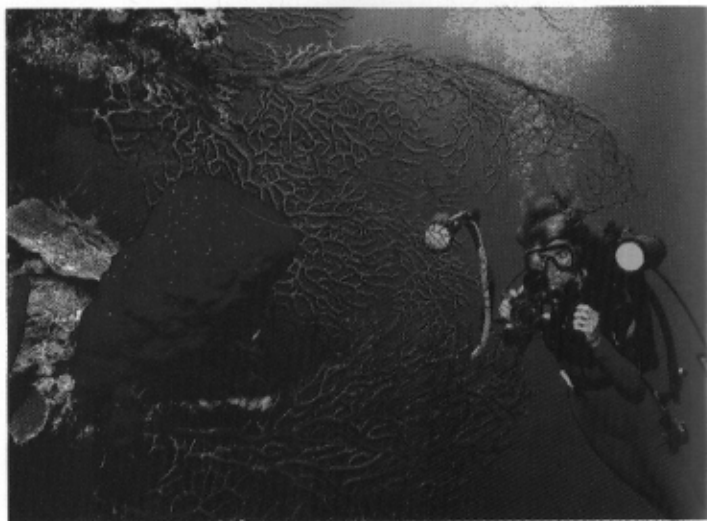

► STEPS TO DISCOVERY:

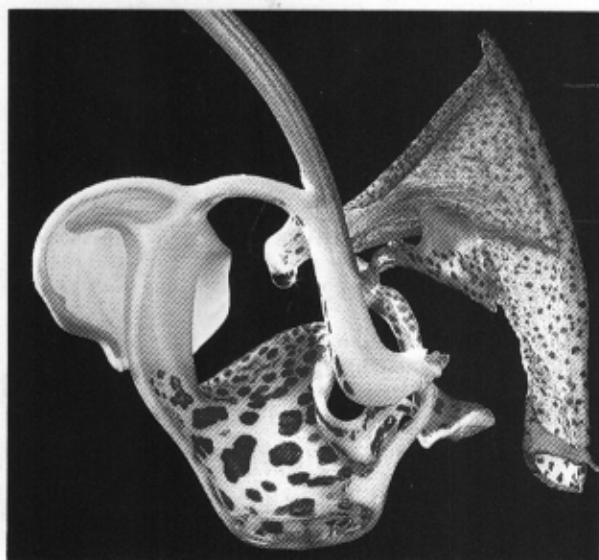

The Genetic Basis of Schizophrenia 131

Gregor Mendel: The Father of Modern Genetics 132

Mendel Amended 138

Mutation: A Change in an Individual's Genotype 140

Genes and Chromosomes 140
 Sex and Inheritance 142
 Aberrant Chromosomes 144
 Evolution and Adaptation: Tying it Together 146

The Human Perspective
Chromosome Aberrations and Cancer 147
Synopsis 147

9 / The Molecular Basis of Genetics 150

- **STEPS TO DISCOVERY:**
 The Chemical Nature of the Gene 151
 The Structure of DNA 152
 DNA: Life's Molecular Supervisor 153
 The Molecular Basis of Gene Mutations 162

The Human Perspective
The Dark Side of the Sun 163

DNA Organization in Prokaryotes and Eukaryotes 164
 Evolution and Adaptation: Tying it Together 164
Synopsis 166

10 / Gene Expression: Orchestrating Life 168

- **STEPS TO DISCOVERY:**
 Jumping Genes: Leaping into the Spotlight 169
 Why Regulate Gene Expression? 170
 Gene Regulation in Prokaryotes 170

The Human Perspective
Clones: Is There Cause for Fear? 174

Gene Regulation in Eukaryotes 174

Levels of Control of Eukaryotic Gene Expression 176
 Evolution and Adaptation: Tying it Together 179
Synopsis 180

11 / Genetics and Human Life 182

- **STEPS TO DISCOVERY:**
 Developing a Treatment for an Inherited Disorder 183
 Genetic Disorders in Humans 184
The Human Perspective
Correcting Genetic Disorders by Gene Therapy 189
 Screening Humans for Genetic Defects 191
 Genetic Engineering 192

The Human Perspective
DNA Fingerprints and Criminal Law 200

Evolution and Adaptation: Tying it Together 201
Synopsis 201

PART 4

Form and Function of Plant and Animal Life 205

12 / Plant Life: Form and Function 206

- **STEPS TO DISCOVERY:**
 Discovering the Plant's Circulatory System 207
 The Basic Plant Design 208
 Plant Tissues 209
 Plant Tissue Systems 213
 Plant Organs 220

The Human Perspective
Agriculture, Genetic Engineering, and Plant Fracture Properties 227

Evolution and Adaptation: Tying it Together 228
Synopsis 228

13 / Plant Life: Reproduction and Development 230

- **STEPS TO DISCOVERY:**
 Plants Have Hormones 231
 Flower Structure and Pollination 233
 Formation of Gametes 235
 Fertilization and Development 237

The Human Perspective
The Fruits of Civilization 240

Fruit and Seed Dispersal 240
Germination and Seedling Development 241
Plant Growth and Development 242

The Human Perspective
***Saving Tropical Rain Forests* 243**

Plant Tropisms 247
Evolution and Adaptation: Tying it Together 248
Synopsis 248

14 / Animal Form and Function 250

- **STEPS TO DISCOVERY:**
The Concept of Homeostasis 251
Controlling Body Temperature: An Example of Homeostasis 252
Homeostatic Mechanisms 252
Four Types of Tissues 252
Organs and Organ Systems 256
The Evolution of Organ Systems 259
Evolution and Adaptation: Tying it Together 260
Synopsis 261

15 / Regulating Bodily Functions: The Nervous and Endocrine Systems 262

- **STEPS TO DISCOVERY:**
The Discovery of Insulin 263
The Nervous System 264
The Endocrine System 276

The Human Perspective
***Chemically Enhanced Athletes* 284**

Evolution and Adaptation: Tying it Together 282
Synopsis 284

16 / Sensory Perception 286

- **STEPS TO DISCOVERY:**
Echolocation: Seeing in the Dark 287
The Response of a Sensory Receptor to a Stimulus 288
Somatic Sensation 288
Vision 288
Hearing and Balance 290

The Human Perspective
***Perceiving the World: It's All in Your Head* 292**

Chemoreception: Taste and Smell 293
Reenter the Brain: Interpreting Impulses into Sensations 294
Evolution and Adaptation: Tying it Together 295
Synopsis 296

17 / Protection, Support, and Movement 298

- **STEPS TO DISCOVERY:**
Vitamin C's Role in Holding the Body Together 299

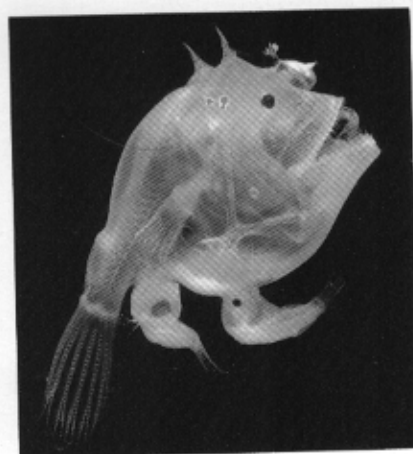

The Integument: Covering and Protecting the Outer Body Surface 300
The Skeletal System: Providing Support and Movement 301

The Human Perspective
***Building Better Bones* 304**

The Muscles: Powering the Motion of Animals 306
Body Mechanics and Locomotion 309
Evolution and Adaptation: Tying it Together 310
Synopsis 311

18 / Nutrition and Digestion 312

- **STEPS TO DISCOVERY:**
The Battle Against Beri-beri 313

The Digestive System: Converting Food Matter into a Form Available to the Body 314

The Human Digestive System: A Model Food-Processing Plant 314

Nutrition 318

The Human Perspective

Necessary Ingredients of Human Nutrition 319

Evolution and Adaptation: Tying it Together 318

Synopsis 322

19 / Circulation, Excretion, and Respiration 324

► STEPS TO DISCOVERY:

Tracing the Flow of Blood 325

Circulation: The Transport of Bodily Fluids 326

Excretion and Osmoregulation: Removing Wastes and Maintaining the Composition of the Body's Fluids 335

Respiration: The Exchange of Respiratory Gases 339

The Human Perspective

Dying for a Cigarette? 343

Evolution and Adaptation: Tying it Together 346

Synopsis 348

20 / Internal Defense: The Immune System 350

► STEPS TO DISCOVERY:

On the Trail of a Killer: Tracking the AIDS Virus 351

Nonspecific Mechanisms: A First Line of Defense 353

Microbe-Specific Defenses: The Immune System 353

Antibody Molecules: Structure and Formation 355

The Human Perspective

Treatment of Cancer with Immunotherapy 357

Immunization 359

Evolution and Adaptation: Tying it Together 359

The Human Perspective

Disorders of the Human Immune System 360

Synopsis 362

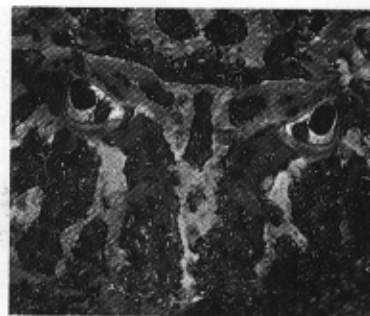

21 / Reproduction and Development 364

► STEPS TO DISCOVERY:

Genes that Control Development 365

Reproduction: Asexual versus Sexual 366

Human Reproductive Systems 367

The Course of Embryonic Development 373

The Human Perspective

Controlling Pregnancy: Contraceptive Methods 374

Human Development 380

Evolution and Adaptation: Tying it Together 384

Synopsis 385

PART 5

Evolution and Diversity 389

22 / Mechanisms of Evolution 390

► STEPS TO DISCOVERY:

Silent Spring Revisited 391

The Basis of Evolutionary Change 393

Factors that Cause Gene Frequencies to Change over Time 393

The Evolutionary Process: Microevolution and Macroevolution 401

The Pace of Evolution: Gradualism and Punctuation Equilibrium 405

Evolution and Adaptation: Tying it Together 406

Synopsis 408

23 / Evidence for Evolution 410

► STEPS TO DISCOVERY:

An Early Portrait of the Human Family 411

Determining Evolutionary Relationships 412

Evidence for Evolution 413

The Evidence of Human Evolution: The Story Continues 417

Evolution and Adaptation: Tying it Together 419

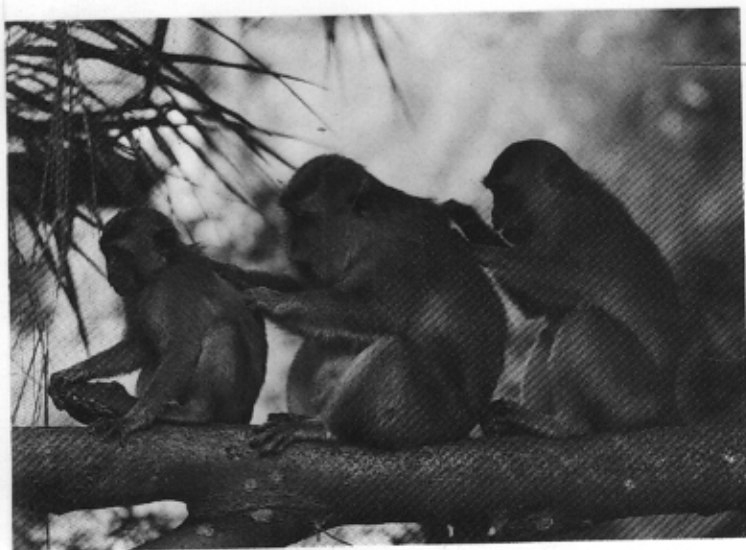

Synopsis 422

24 / Evolution: Origin and History of Life 424

► STEPS TO DISCOVERY:

Evolution of the Cell 425

The Earth's Beginnings 426

The History of Life—A Brief Overview 427
The Geologic Time Scale: Spanning the Earth's History 427

The Human Perspective
The Extinction Detectives 436

Evolution and Adaptation: Tying it Together 436
Synopsis 438

25 / The Microbial Kingdoms: Viruses, Monerans, Protists, and Fungi 440

► **STEPS TO DISCOVERY:**
The Burden of Proof: Germs and Infectious Disease 441

Viruses 442
The Monera Kingdom 444

The Human Perspective
Sexually Transmitted Diseases 452

The Protist Kingdom 455
The Fungus Kingdom 462
Evolution and Adaptation: Tying it Together 466
Synopsis 468

26 / The Plant Kingdom 470

► **STEPS TO DISCOVERY:**
Distinguishing Plant Species: Where Should the Dividing Lines Be Drawn? 471

Major Evolutionary Trends 472
Overview of the Plant Kingdom 472
Algae: The First Plants 474
Bryophytes: Plants Without Vessels 476
Tracheophytes: Plants with Fluid-Conducting Vessels 478

The Human Perspective
Brown Algae: Natural Underwater Factories 479

Seed Plants 483
Evolution and Adaptation: Tying it Together 487
Synopsis 488

27 / Animal Diversity 490

► **STEPS TO DISCOVERY:**
The World's Most Famous Fish 491
The Elements of a Body Plan 493
Invertebrates 494
Vertebrates 508
Evolution and Adaptation: Tying it Together 513
Synopsis 514

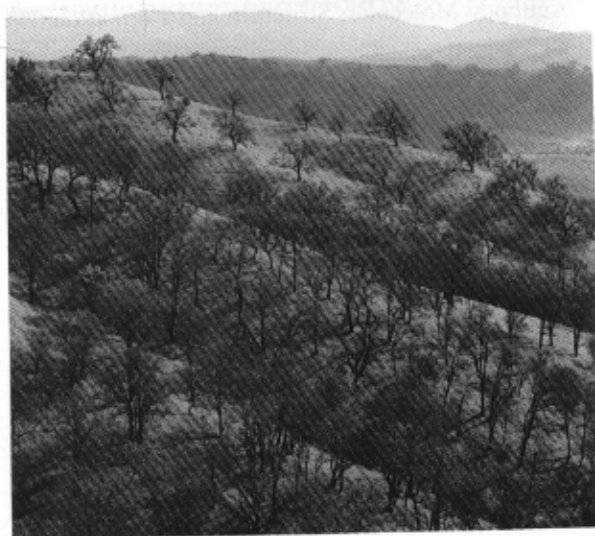

PART 6 Ecology and Animal Behavior 517

28 / Networks of Life: Ecology and the Biosphere 518

► **STEPS TO DISCOVERY:**
The Antarctic Ozone Hole 519
Ecology Defined 520
The Earth's Climates 520
Aquatic Ecosystems 521
Biomes: Patterns of Life on Land 529

The Human Perspective
Acid Rain and Acid Snow: Global Consequences of Industrial Pollution 532

Evolution and Adaptation: Tying it Together 538
Synopsis 538

29 / Natural Order of Life: Ecosystems and Communities 540

► STEPS TO DISCOVERY:

The Nature of Communities 541

Ecosystem Boundaries 542

The Structure of Ecosystems 542

Components of the Biotic and Abiotic
Environments 542

Tolerance Range 544

Limiting Factors 544

Ecological Niches 544

Energy Flow through Ecosystems 546

Biogeochemical Cycles: Recycling Nutrients in
Ecosystems 551

The Human Perspective

The Greenhouse Effect: Global Warming 554

Succession: Ecosystem Change and Stability 555

Evolution and Adaptation: Tying it Together 557

Synopsis 558

30 / Life's Interactions: Communities 560

► STEPS TO DISCOVERY:

Species Coexistence: The Unpeaceable
Kingdom 561

Competition: Interactions that Harm Both
Organisms 562

Interactions that Harm One Organism and Benefit
the Other 565

Commensalism: Interactions that Benefit One
Organism and Have No Effect on the Other 570

Interactions that Benefit Both Organisms 571

Evolution and Adaptation: Tying it Together 573

Synopsis 574

31 / Animal Behavior 576

► STEPS TO DISCOVERY:

Mechanisms and Functions of Territorial
Behavior 577

Mechanisms of Behavior 578

Development of Behavior 582

Survival Value of Social Behaviors 582

Evolution and Adaptation: Tying it Together 588

The Human Perspective

*Animal Cognition: Just How Human-like are Other
Animals?* 589

Synopsis 590

32 / Population Dynamics 592

► STEPS TO DISCOVERY:

Threatening a Giant 593

Population Structure 594

Factors Affecting Population Growth 595

The Human Perspective

Impacts of Poisoned Air, Land, and Water 599

Factors Controlling Population Growth 600

Human Population Growth 601

Evolution and Adaptation: Tying it Together 604

Synopsis 605

APPENDIX

A / Metric and Temperature Conversion
Charts A-1

B / Microscopes: Exploring the Details of
Life B-1

C / The Hardy-Weinberg Principle C-1

D / Careers in Biology D-1
