

CONTENTS

Preface / ix

1 • INTRODUCTION / 1

2 • ISLANDS IN BARKLEY SOUND, BRITISH COLUMBIA / 6

Geography and History / 6

Geology and Topography / 9

Climate / 10

More Island Geography and Topography / 13

Flora and Vegetation / 23

Methodological Notes / 30

3 • ISLAND BIOGEOGRAPHY: CONCEPTS, THEORY, AND DATA / 36

The Basic Model / 36

Some Embellishments / 38

Incidence Functions / 39

Colonization and Extinction Data / 41

Historical Legacies / 50

Generalities, Specifics, and Modifications of the M/W Model / 55

4 • SPECIES NUMBER, ISLAND AREA, AND ISOLATION / 56

Equilibrium or Nonequilibrium Species Numbers? / 56

Variation in Species Counts on Islands / 56

Cumulative Species Numbers / 62

Species Richness on Islands / 63

5 • NESTEDNESS AND ASSEMBLY RULES / 74

Inferences from Species-by-Sites Matrices / 74

Forest Species / 76

Shoreline Habitats / 85

Edge Habitats / 100

6 • SPECIES TURNOVER IN SPACE AND TIME / 116

Colonization and Extinction, Persistence and Turnover / 116

Species Turnover in Time, and Island Size / 124

Species Turnover in Space / 128

7 • DISPERSAL SYNDROMES, INCIDENCE, AND DYNAMICS / 138

Dispersal in Plants: Options / 138

Ferns / 141

Fruiting Shrubs / 150

Hydrochores: Drifters on the Sea / 161

Anemochores: Drifters on the Wind / 166

8 • ECOLOGICAL AND EVOLUTIONARY SHIFTS
ON CONTINENTAL ISLANDS / 180

Alien Invaders / 181

Ecological Shifts in Impoverished
Biotas / 185

Evolutionary Shifts in Isolated
Populations / 194

9 • SYNOPSIS: LESSONS FROM A CONTINENTAL
ARCHIPELAGO / 205

The Barkley Sound Scene / 205

Is There an Equilibrium out There? / 206

Colonization and Extinction
Dynamics / 209

Coexistence and a Potential Role for
Competition / 212

Adaptation, Evolution, Conservation / 215

Appendixes / 217

References / 248

Index / 256
