<i>List of Contributors</i>	page vii
<i>Preface</i>	ix
Chapter 1 Foundations of Anthropological Genetics M. H. Crawford	1
Part I Theory	17
Chapter 2 Partitioning of Genetic Variation in Human Populations and the Concept of Race Lorena Madrigal and Guido Barbujani	19
Chapter 3 Natural Experiments in Human Gene Mapping: The Intersection of Anthropological Genetics and Genetic Epidemiology Joe Terwilliger and Joe Lee	38
Part 2 Methods	77
Chapter 4 The Importance of Field Research in Anthropological Genetics: Methods, Experiences and Results M. H. Crawford	79
Chapter 5 The Confluence of Anthropological Genetics and Anthropological Demography James H. Mielke and Alan G. Fix	112
Chapter 6 Molecular Markers in Anthropological Genetic Studies Rohina Rubicz, Phil Melton, and Michael Crawford	141
Chapter 7 The Use of Quantitative Traits in Anthropological Genetic Studies of Population Structure and History John Relethford	187
Chapter 8 Ancient DNA and its Application to the Reconstruction of Human Evolution and History Dennis O'Rourke	210
Part 3 General Applications	233
Chapter 9 Applications of Molecular Genetics to Forensic Sciences Moses Schanfield	235

Chapter 10	Emerging Technologies: The Bright Future of Fluorescence <i>Eric Devor</i>	277
Chapter 11	Mapping Genes Influencing Human Quantitative Trait Variation <i>John Blangero, Jeff T. Williams, Laura Almasy and Sarah Williams-Blangero</i>	306
Part 4	The Human Diaspora	335
Chapter 12	Human Origins Within and Out of Africa <i>Sarah A. Tishkoff and Mary Katherine Gonder</i>	337
Chapter 13	The Peopling of Europe <i>Barbara Arredi, Estella S. Poloni and Chris Tyler-Smith</i>	380
Chapter 14	The Peopling of Oceania <i>Elizabeth Matisoo-Smith</i>	409
Chapter 15	The Prehistoric Colonization of the Americas <i>Francisco Salzano</i>	433
Chapter 16	Anthropological Genetics: Present and Future <i>Henry Harpending</i>	456
	Index	467
