Introduction: Why a dynamic systems approach to fostering human development? 1

ALAN FOGEL, BARBARA J. KING, AND STUART G. SHANKER

Part I Dynamic relationships between genetics and environments 9

1 Developmental dynamics: the new view from the life sciences 11

ROBERT LICKLITER

2 Genes, experience, and behavior 18

TIMOTHY D. JOHNSTON

3 How dynamic systems have changed our minds 25

KEN RICHARDSON

4 Individual development as a system of coactions: implications for research and policy 41

GILBERT GOTTLIEB AND CAROLYN

TUCKER HALPERN

5 Gene-environment interactions and inter-individual differences in rhesus monkey behavioral and biological development 48

STEPHEN J. SUOMI

Part II The dynamic system of the child in the family 55

6 Relationships that support human development 57

ALAN FOGEL

- 7 The impact of emotions and the emotional impact of a child's first words 65
STUART G. SHANKER
- 8 Emotional habits in brain and behavior: a window on personality development 72
MARC D. LEWIS
- 9 Creating family love: an evolutionary perspective 81
BARBARA J. KING

Part III The dynamic system of the child in social and physical environment 89

- 10 The tempest: anthropology and human development 91
PETER GOW
- 11 An anthropology of human development: what difference does it make? 104
CHRISTINA TOREN
- 12 The social child 112
TIM INGOLD
- 13 Learning about human development from a study of educational failure 119
GILLIAN EVANS
