	<i>Introduction</i>	ix
Part 1	The diversity of wetland animals	1
Chapter 1	Invertebrates: the crustaceans	3
	Copepods	4
	Plants: phytoplankton and zooplankton	6
	Other smaller crustaceans	7
	Crayfishes, shrimps and crabs	12
	Moulting and growth	15
Chapter 2	Invertebrates: the insects	17
	The insect body plan	17
	Wetland insects: the major groups	21
	Emergence of a dragonfly	23
	Metamorphosis	26
Chapter 3	Other invertebrate players	35
	Miniscule worlds	35
	Molluscs	37
	The nature of water: O ₂ , CO ₂ and breathing	38
	Worms, leeches, sponges and jellyfish	40
	Spiders and mites	42
	Parasites and other strange life forms	43
Chapter 4	Fishes	47
	Moving between the sea and fresh waters	48
	Finding your way in murky waters	51
	The diversity of native freshwater fishes	52
	Human impacts: introduced fishes	59

Chapter 5	Frogs, reptiles and mammals	61
	The life cycles of frogs	62
	Wetland frogs	64
	Freshwater turtles	65
	Lizards, snakes and crocodiles	67
	Human impacts: alien amphibians ... and a reptile	69
	Mammals	71
	Origins: Gondwanaland and Asia	72
Chapter 6	Waterbirds	75
	The migratory urge	75
	Human impacts: waterbirds, environmental flows and agriculture	78
	Eggs, nests and later problems	80
	The diversity of wetland birds	81
	Australian pelicans	89
	Inland shorebirds and seabirds	92
Part 2	Living with change	95
Chapter 7	Making the most of change	97
	Small worlds	97
	Crabs and crayfishes	101
	Plants: paperbarks and water-ribbons	104
	Frogs	105
	Fishes	107
	Birds	109
	Human impacts: drainage	112
Chapter 8	Moving on	115
	Fishes and the upstream urge	115
	Origins: moving inland from the sea	120
	Overland or by air	121
	Insects	123
	Waterbirds – moulting and migration	125
	Human impacts: climate change	127
Chapter 9	Rebirth of a lake	129
	Drought and the new millennium	130
	Plants: movement	132
	Returning waters	133
	The feathered hordes	138
	Lake Corangamite	143

Chapter 10	Predator and prey	145
	What it takes to be a predator	146
	Hidden predators – arthropods	148
	Fishes as predators and prey	152
	Waterbirds as predators	154
	Crocodiles	156
	Human impacts: hunting, fishing and aquaculture	158
Part 3	Ecology: fitting into your environment	161
Chapter 11	High and low places	163
	Water flowing underground	163
	Carnivorous plants	166
	Where the salt goes	170
	Troglodytes	175
Chapter 12	Streams, brooks and fast rivers	177
	On higher ground	178
	Staying put in moving waters	179
	Spiny crayfishes	181
	Fishes and fast streams	183
	Galaxiids: cryptic diversity in the south	186
	Frogs and reptiles	187
Chapter 13	Slow rivers in an ancient land	189
	Plants: river red gum	191
	Fishes of the inland rivers	192
	Turtles and invertebrates ... but few frogs	195
	Waterbirds: drifters and stayers	197
	Human impacts: why the bunyip disappeared	200
Chapter 14	Floodplains, billabongs and backwaters	203
	Human impacts: weeds	205
	Insects and crustaceans	206
	Fishes, frogs and reptiles	208
	Rainbowfishes: flamboyant diversity in the north	211
	Waterbirds	212
Chapter 15	Marshes and swamps	215
	Swamp plants: diversity and interactions	215
	Plants: sedges, reeds and rushes	217

	Invertebrate lifestyles	219
	The nature of water: surface tension	221
	Frogs, tadpoles and waterbirds	223
Chapter 16	Freshwater lakes, lagoons and other dark waters	227
	The nature of water: black waters – peat and tannins	228
	Fishes and frogs	230
	Waterbirds and platypus: guides to hidden worlds	233
Chapter 17	Estuaries, mangroves and saltmarshes	237
	Plants: saltmarsh and mangroves	239
	Shifting lives in estuaries	241
	Fishes of estuaries and streams	242
	Origins: gobies (and gudgeons)	246
	Reptiles and fishes in the north	248
	Other coastal wetlands	249
Chapter 18	New opportunities: dams and other created wetlands	255
	What wetland animals need	257
	Attracting waterbirds	258
	Fishes and frogs: finding a balance	261
	Hidden worlds	263
	Created wetlands and habitat	266
