

CONTENTS

Introduction		1
1 Obligate Parasites of Cells		5
<i>The Virosphere and Its Metagenome</i>	7	
<i>Complexity and "Dark Matter"</i>	11	
<i>Selfish Information and the Essence of Being Viral</i>	15	
<i>The Emergence of Egotistical Replicators</i>	20	
<i>The Viral Empire</i>	21	
2 Viruses, Genes, and Ecosystems		22
<i>Lifestyles and Life Cycles</i>	23	
<i>Lysogeny: Exercising Temperance</i>	27	
<i>Kill the Winner</i>	30	
<i>Gene Brokers</i>	33	
<i>Selfishness Drives Adaptive Evolution</i>	35	
<i>Phages and the Microbiome</i>	39	
<i>Unfriendly Competition</i>	42	
<i>Chemical Warfare</i>	43	
3 Potentiation of Bacterial Diseases by Phages		46
<i>For a Charm of Powerful Trouble</i>	48	
<i>Toxic Enablers</i>	49	
<i>Choose Your Poison</i>	53	
<i>Treasure Islands</i>	56	
<i>Prophage Induction and Antibiotic Drug Resistance</i>	59	
4 Viruses and Higher Organisms		64
<i>Viruses, Cells, Organisms, and Populations</i>	64	
<i>"Just a Virus"</i>	67	
<i>Human Rhinoviruses</i>	68	
<i>Uncommon Diversity</i>	73	
<i>Accidents of Pathogenesis</i>	77	
<i>Mutation, Diversity, and Quasiespecies</i>	80	
5 The Flu: No Common Cold		88
<i>Antigenic Escape Artists</i>	92	
<i>Human Influenza A Virus</i>	94	
<i>Epidemic Influenza: Dress for the Season</i>	97	

	<i>Quasispecies, Sequence Clusters, and Codon Bias</i>	99
	<i>Correlating Genetic and Antigenic Evolution</i>	103
	<i>Seeding of Seasonal Epidemics</i>	105
	<i>Pandemic Influenza: The Emperor with No Clothes</i>	106
6	Alternative Virus Lifestyles	115
	<i>Latency: Till Death Do Us Part</i>	119
	<i>All in the Family Herpesviridae</i>	124
7	Evolutionary Mechanisms of DNA Viruses	128
	<i>Gene Duplication and Gene Capture</i>	131
	<i>Poxvirus Evolution</i>	137
	<i>Poxvirus Party Tricks</i>	139
	<i>Small DNA Virus Evolution</i>	143
8	Viroids and Megaviruses: Extremes	149
	<i>Viroids: The Smallest</i>	150
	<i>Evolutionary Reliquary</i>	154
	<i>Megaviruses: The Biggest</i>	158
	<i>Big and Bigger</i>	160
	<i>Virophages: Fleas upon Fleas</i>	161
	<i>Chimerism</i>	164
	<i>Megavirus Origins: Mavericks at Heart</i>	165
9	HIV-1: A Very Modern Pandemic	167
	<i>A New Disease and a New Virus</i>	171
	<i>Anatomy of HIV-1</i>	175
	<i>HIV in the Making</i>	178
	<i>Socioepidemiology of AIDS: A Man-Made Epidemic</i>	182
	<i>Within-Host Evolution: A Very Personal Arms Race</i>	185
	<i>Shortsighted Evolution</i>	190
	<i>Adaptive Evolution: An Evolving Relationship</i>	194
	<i>Outrunning the Red Queen</i>	198
	<i>Medicine at the Virus-Host Interface</i>	201
	<i>Resistance Is Futile</i>	202
10	Cross-Species Infections: Means and Opportunity	204
	<i>A Rogue's Gallery of Emerging Viruses</i>	207
	<i>Adaptive Evolution in Zoonosis</i>	209
	<i>Fitness Landscape</i>	211
	<i>A Shifting Fitness Landscape</i>	213
	<i>The Paradox in RNA Virus Evolution</i>	215
	<i>RNA Viruses and Molecular Clocks</i>	219
	<i>Arboviruses: Vector-Borne Viruses</i>	224
	<i>Evolutionary Compromise</i>	227
	<i>Host Restriction</i>	229

11 Future Pandemic Influenza: Enemy at the Gates	236
<i>Real and Present Danger</i>	238
<i>Pandemic Threat Level</i>	241
<i>The Pandemic Phenotype</i>	242
<i>Outbreak</i>	246
12 Ebolavirus	248
<i>EBOV Makona</i>	251
<i>What We Were Afraid to Say about Ebola</i>	253
<i>Evolution or Adaptive Change</i>	256
<i>EBOV Persistence</i>	260
13 Viral Zoonoses and Animal Reservoirs	262
<i>The Usual Suspects</i>	264
<i>Filovirus Origins</i>	265
<i>Bats and Viral Zoonoses</i>	266
<i>A Special Relationship</i>	267
<i>Tolerance and Resistance</i>	269
14 Endogenous Retroviruses: Our Viral Heritage	275
<i>Genome Invasion by Retroviruses</i>	277
<i>Endogenization in Progress</i>	282
<i>Change Agents</i>	286
<i>Domestication of ERV Genes</i>	290
<i>Endogenous Viral Elements</i>	294
15 Viruses as Human Tools	299
<i>Myxoma Virus: Biological Control</i>	300
<i>Genomics of an Attenuated Poxvirus</i>	303
<i>Orthopoxviruses: Past Solutions and Future Problems</i>	305
<i>Live-Attenuated Viruses</i>	307
<i>Attenuation by Design</i>	310
<i>Virus Therapeutics</i>	311
<i>Doctor's Little Helpers</i>	312
<i>Oncolytic Viruses</i>	313
16 Conclusion: Humanity and Viruses	317
<i>The Human Future and Viruses</i>	318
<i>Beauty in Design</i>	321
