|----------------------------------------------|-----|
| Preface .....                                | 4   |
| Introducing fungal life .....                | 6   |
| Fungal spores .....                          | 8   |
| Hyphae .....                                 | 12  |
| Kinship .....                                | 18  |
| The perfect imperfects .....                 | 24  |
| Fruiting bodies .....                        | 34  |
| <b>The Ascomycota</b> .....                  | 46  |
| Cup fungi .....                              | 50  |
| Hysterioid fungi .....                       | 68  |
| Flask fungi .....                            | 70  |
| Cleistothecial fungi .....                   | 84  |
| Discolichens .....                           | 88  |
| Mazaedioid fungi .....                       | 94  |
| Truffles .....                               | 98  |
| Laboulbeniomyces .....                       | 100 |
| <b>The Basidiomycota</b> .....               | 102 |
| Corticoid fungi .....                        | 106 |
| Stereoid fungi .....                         | 110 |
| Polypores .....                              | 115 |
| Boletes .....                                | 124 |
| Agarics .....                                | 133 |
| Cyphelloid fungi .....                       | 146 |
| Chanterelles .....                           | 150 |
| Tooth fungi .....                            | 154 |
| Clubs and corals .....                       | 160 |
| Gasteroid fungi .....                        | 172 |
| Jelly fungi .....                            | 182 |
| Rusts and smuts .....                        | 188 |
| <b>The Zygomycota and other groups</b> ..... | 192 |
| <b>Fungal ecology</b> .....                  | 194 |
| Decomposers .....                            | 194 |
| Decomposers of debris .....                  | 196 |
| Wood-decaying fungi .....                    | 202 |
| Fungi on dung .....                          | 206 |
| Decaying fungi in other strange places ..... | 208 |
| Mycorrhizal fungi .....                      | 210 |
| Lichenized fungi .....                       | 218 |
| Parasitic fungi .....                        | 220 |
| <b>Fungi in the world</b> .....              | 223 |
| Where fungi grow .....                       | 223 |
| Where nothing grows .....                    | 236 |
| Why we need fungi .....                      | 238 |
| <b>Fungal future</b> .....                   | 254 |
| <b>Postscript</b> .....                      | 259 |
| <b>Index</b> .....                           | 260 |
