Acknowledgments	ix
1. Introduction	1
1.1 A Matter of Perspective	3
1.2 The Nature of Feedback	4
1.3 Which Autotrophs and Which Traits?	6
1.4 Trait Variation and Trait Diversity	7
1.5 Which Trophic Interactions?	9
1.6 Which Ecosystem Processes?	10
1.7 Webs of Green and Brown	11
2. The Phytochemical Landscape	13
2.1 Defining the Phytochemical Landscape	13
2.2 Variation on the Phytochemical Landscape	17
3. The Variable Chemistry of Primary Production	24
3.1 The Challenging Chemistry of Autotrophs	24
3.2 Origins of Variation in Autotroph Chemistry on the Phytochemical Landscape	25
3.3 Microbial Symbionts and Variation in Autotroph Chemistry: Whose Phenotype Is It Anyway?	30
3.4 Summary and Conclusions	38
4. Effects of Primary Producer Chemistry on Trophic Interactions	39
4.1 Herbivores and Herbivory: The Interactive Effects of Autotroph Chemistry and Natural Enemies	39
4.2 Effects of the Phytochemical Landscape on Natural Enemies	91

5. Effects of Trophic Interactions on the Chemistry of Primary Producers	109
5.1 Background	109
5.2 Effects of Herbivores and Predators on Autotroph Community Structure	111
5.3 Consumer Effects on Succession—Temporal Change on the Phytochemical Landscape	121
5.4 Phytochemical Induction—A Multiplier of Variation in Autotroph Chemistry on the Phytochemical Landscape	124
6. Effects of Autotroph Chemistry on Nutrient Dynamics	138
6.1 The Elements of Life	138
6.2 Recalcitrant Organic Chemistry	142
6.3 Nutrients, Stoichiometry, and the Decomposition of Autotroph Residues	148
6.4 Effects of Autotroph Identity and Diversity on Nutrient Dynamics	153
6.5 Effects of Phytoplankton Residue Chemistry on Nutrient Dynamics in Aquatic Ecosystems	160
6.6 Effects of Phytoplankton Stoichiometry on Nutrient Dynamics in Aquatic Ecosystems	168
7. Effects of Nutrient Availability on the Chemistry of Primary Producers	173
7.1 Introduction	173
7.2 Effects of Nutrient Dynamics on the Chemical Phenotype of Individual Autotrophs	175
7.3 Effects of Nutrient Availability on Primary Producer Diversity	185
7.4 Evolutionary Effects of Nutrient Availability on Autotroph Chemistry	192
7.5 Conclusions	195
8. Linking Trophic Interactions with Ecosystem Nutrient Dynamics on the Phytochemical Landscape	198
8.1 Putting It All Together: Linking Cycles and Generating Feedback	198
8.2 From Trophic Interactions to Ecosystem Processes	199
8.3 Effects of Herbivory on Nutrient Dynamics	200
8.4 Effects of Predators on Nutrient Dynamics	227
8.5 Effects of Nutrient Dynamics on Trophic Interactions	236
8.6 Final Thoughts on Feedback Loops	247

9. Synthesis and Prospects for Future Work	252
9.1 Introduction	252
9.2 Priority 1: Let's Make Some Maps	253
9.3 Priority 2: Assess the Frequency and Strength of Spatial Correlation	254
9.4 Priority 3: Understanding Time Lags and the Temporal Scale of Spatial Correlation on the Phytochemical Landscape	255
9.5 Priority 4: Exploring Variation in the Strength of Feedback between Trophic Interactions and Nutrient Dynamics on the Phytochemical Landscape	262
9.6 Priority 5: Comparing the Role of the Phytochemical Landscape in Terrestrial and Aquatic Ecosystems	272
9.7 Concluding Remarks	274
References Cited	277
