Volume 1 (chanterelles, agarics and boletes)

Preface	6	collybioids	274
Acknowledgements	7	marasmioids	302
Scope and design	8	<i>Cystoderma</i> and the like	314
Why study fungi?	10	lepiotoids	320
The fungal kingdom	10	<i>Chamaemyces</i> and <i>Limacella</i>	348
Fungal nutrition	14	amanitoids	352
Fungal biogeography and habitats	20	<i>Russula</i>	372
Asexual propagation	22	lactarioids	414
Fruitbodies	24	entolomatoids	448
Microscopy	31	pluteoids	486
Tastes and smells	37	<i>Agaricus</i> and <i>Allopsalliota</i>	500
Working with fruitbodies	38	coprinoids	520
General identification wheels	42	psathyrelloids	546
Chanterelles and the like	46	hypholomatoids	580
Identification wheels for groups of agarics	56	Gomphidioids and <i>Melanomphalia</i>	596
pleurotoids	60	pholiotoids	600
clitocyboids	98	little brown mushrooms (LBMs)	616
omphalinoids	128	<i>Inocybe</i>	652
hygrocyboids	142	<i>Hebeloma</i>	680
mycenoids	176	<i>Cortinarius</i>	690
tricholomatoids	226	<i>Paxillus</i> and the like	756
		Boletes	760
