

Contents

Introduction

vi

SECTION 1 Biology Today: Environmental Biology

1 Biology, the science of life	2
2 The range of living things: systematics	18
3 Introduction to ecology	44
4 Humans and the environment	74
5 Biology and industry	98

SECTION 2 Cell Biology

117

6 The chemistry of living things	118
7 Cell structure	142
8 Cell biochemistry	166
9 The nucleus in division and interphase	186
10 Cell specialisation	206
11 Movement in and out of cells	224

SECTION 3 The Maintenance of the Organism

241

12 Autotrophic nutrition	242
13 Holozoic nutrition of mammals	272
14 Variety in heterotrophic nutrition	294
15 Respiration and gaseous exchange	306
16 Uptake and transport within plants	324
17 Transport within animals	346
18 Osmoregulation and excretion	376

SECTION 4 The Responding Organism

401

19 Growth and development	402
20 Response and coordination in plants	424
21 Response and coordination in animals	448
22 Support and locomotion	484
23 Homeostasis and behaviour	510
24 Health and disease	532

SECTION 5 The Continuity of Life

551

25 Viruses, prokaryotes, protoctista and fungi	552
26 Life cycles of green plants	568
27 Life cycles of animals	588
28 Variation and inheritance; genetics	612
29 Applications of genetics	636
30 Evolution	652

SECTION 6 The Nature of Science

679

31 What is this thing called Biology?	680
