INTRODUCTION		LEUKOCYTES AND LEUKOCYTE DEVELOPMENT	
1 The Immune System		5 Leukocyte Surface Molecules	
The Immune System	1.1	Lineage Fidelity	5.1
Cells of the Immune System	1.2	The Leukocyte Cell Surface	5.2
The Lymphoid System	1.7	Protein Superfamilies	5.4
Overview of the Immune Response	1.8	Summary	5.9
Immune Effector Systems	1.14	Further Reading	5.10
Normal and Aberrant Immune Responses	1.15	6 Leukocyte Development	
Summary	1.16	The Pluripotent Stem Cell	6.1
Further Reading	1.16	Haematopoietic Progenitor Cells	6.2
ANTIGEN-BINDING MOLECULES		Haematopoietic Growth Factors	6.2
2 Antigen Receptor Molecules		Receptors for Haematopoietic Growth Factors	6.5
Antibody Structure	2.1	Phagocyte Development	6.5
Antibody Genes	2.5	B Cell Development	6.7
Antibody Functions	2.8	T Cell Development	6.9
T Cell Receptors	2.11	The $\gamma\delta$ T Cell Lineage	6.13
T Cell Receptor Structures	2.12	Summary	6.14
Genomic Organization	2.15	Further Reading	6.14
Regulation of TCR Gene Expression	2.18	INITIATION OF THE IMMUNE RESPONSE	
Distribution of $\alpha\beta$ and $\gamma\delta$ TCRs	2.18	7 Antigen Processing and Presentation	
Development of $\gamma\delta$ T Cell Subsets	2.20	Antigen Processing	7.1
Summary	2.21	Processing for Class I-Restricted Recognition —	
Further Reading	2.22	Endogenous Antigens	7.5
3 The Generation of Diversity		Processing for Class II-Restricted Recognition —	
Proteins Involved in Antigen Receptor Gene		Exogenous Antigens	7.10
Rearrangement	3.1	Antigen Presentation to T Cells	7.15
Antigen Receptor Gene Rearrangement	3.1	Antigen Presenting Cell Types	7.15
Genetic Mechanisms for Diversity Generation	3.3	Summary	7.18
The Size of the Primary B and T Cell Repertoires	3.7	Further Reading	7.18
Structure of Ig and TCR Binding Sites	3.8	8 T Lymphocyte Activation and Maturation	
Summary	3.9	T Cell Activation	8.2
Further Reading	3.10	Co-Stimulatory Signals in T Cells	8.8
4 Class I and II Molecules of the MHC		Development of Post-Thymic T Cells	8.10
Structure of Class I and Class II Molecules	4.1	Summary	8.15
Genomic Organization of the MHC	4.4	Further Reading	8.15
Genetic Basis of Polymorphism	4.8	9 B Cell Activation and Maturation	
Biosynthesis of MHC Class I and Class II Molecules	4.10	CD5 ⁺ B Cells	9.1
Expression of Class I and II Molecules	4.11	Activation	9.1
Summary	4.13	B Cell Maturation	9.6
Further Reading	4.15	Memory B Cells	9.11
		Summary	9.13
		Further Reading	9.15

INTERACTIONS OF IMMUNOLOGICALLY ACTIVE CELLS

10 Cytokines and Chemokines	
Structure of the Cytokines and their Receptors	10.1
Cytokines Playing a Major Role in T Cell Function	10.5
Cytokines Acting on B Cells	10.8
Cytokines that Modulate Inflammation	10.10
Summary	10.13
Further Reading	10.14

11 Immunoregulation

Regulation by Antigen	11.1
Genetic Control of Immune Responses	11.2
The Role of the Antigen Presenting Cell in Immune Regulation	11.7
Regulation of the Immune Response by T cells	11.8
Regulation of the Immune Response by Immunoglobulin	11.10
Regulation of the Immune Response via the Idiotype Network	11.11
Modulation of Immune Responses by Nervous and Endocrine Systems	11.13
Summary	11.16
Further Reading	11.17

12 Tolerance and Autoimmunity

Mechanisms of B Cell Tolerance Induction	12.1
T Cell Tolerance	12.6
Experimental Induction and Maintenance of Tolerance	12.8
Autoimmune Disease	12.14
Summary	12.15
Further Reading	12.16

IMMUNOLOGICAL EFFECTOR SYSTEMS

13 Complement

Activation Pathways	13.2
Structure-Function Relationships of Complement Molecules	13.8
Complement Effector Functions	13.10
Complement in Hypersensitivity and Autoimmunity	13.15
Summary	13.15
Further Reading	13.16

14 Cell Traffic and Inflammation

Lymphocyte Recirculation	14.1
Movement of Antigens and Antigen Presenting Cells	14.3
Adhesion Molecules	14.4
Models of Leukocyte Migration	14.11
Control of Blood Flow and Vascular Permeability	14.14
Phagocytes	14.17
Summary	14.21
Further Reading	14.22

15 Cytotoxic Effector Cells

Cytotoxic Lymphocytes	15.1
Target Cell Recognition and Effector Cell Activation	15.3
Killing — Delivery of the 'Lethal Hit'	15.6
Non-Lymphoid Cytotoxic Effectors	15.11
Summary	15.12
Further Reading	15.13

16 Immune Response To Pathogens

Intracellular and Extracellular Pathogens	16.2
Immune Recognition of Pathogens	16.2
Evasion of Immune Recognition	16.11
Effector Systems	16.14
Cross-Reactions of Microbial and Host Antigens	16.15
Summary	16.15
Further Reading	16.16

17 Therapeutic Manipulation

Modulation of the Immune Response through the Cytokine or the Chemokine Network	17.1
Modulation of the Immune Response through Interference with Key Stages in Lymphocyte Activation	17.4
Interference with Adhesion Molecules on Endothelium	17.5
DNA Vaccination	17.7
Peptide Induced Tolerance	17.8
Summary	17.8
Further Reading	17.8
